Scholar Summative Reflection

Looking through your Classroom Participation Logs and the notes you took while working with your mentor teacher throughout this quarter, write a reflection on the following (please type your responses):

1. What are some positive classroom experiences for the students, for you, and for your mentor teacher this quarter? What, specifically, do you think enabled each of these experiences to happen in the classroom?
2. Were there any times when student conduct hindered the learning experience in the classroom? If so, what were some particular strategies you or your mentor teacher employed to return the focus to learning? If not, in what ways has the established classroom environment cultivated positive student behavior?
3. Looking back at the goals that you set at the beginning of the quarter/year, what, if any, progress have you made toward achieving those goals? Are you happy with where you are now? Are there any goals you would like to change or add?
