## Executive Summary

1.0

# Executive Summary

## Introduction

The California State University, San Bernardino brought LPA onboard in the Fall of 2021 to begin the process of developing an administrative space study that can be utilized to assess current and future needs. The goal is to provide the University the ability to make informed planning decisions regarding growth, change and operational impacts. This section will provide an overview of the purpose, methodology, goals, guiding principles and significant findings from the data gathering and analysis.

The University is experiencing historic growth and change. The Administrative Space Study provides the context and information for future workplace planning at both the San Bernardino and Palm Desert campuses. This study represents the first step to establish guidelines for the University's growth.

## Acknowledging the Need

It has been determined by the University Space Planning Advisory Committee (SPAC) that there is a critical need to evaluate and understand the space needs for all the various workplace conditions throughout the institution. Specifically, a detailed analysis of the Space & Facilities Database (SFDB), summary of findings and validation to:

- Prepare for future growth and operational impacts based on physical planning
- Understand how physical locations may impact workflow, culture and services
- Benchmark existing conditions and provide indicators for future decisions

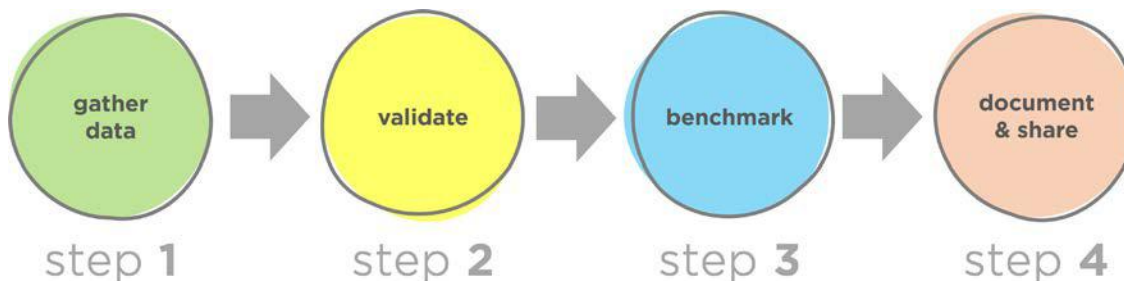

## Purpose

The study will assist identifying physical spatial ambitions, needs, and disparity through an evaluation of all the Divisions' space inventory and their respective departments.

## Methodology

The approach is meant to be a high-level evaluation of the Divisions that considers relevant detailed space data information from the SFDB. The process maintains an approximated overview throughout due to the complexity and accuracy of the provided information – the SFDB remains a searchable tool as a starting point for database queries. This study has been intentional to simplify and focus the documentation as necessary because it allows the information to be easily navigated and allow users to focus search efforts. The goal is to provide clear, adequate information while encouraging the use of additional resources for the most accurate and up to date information.

The steps for the process were organized into four distinct phases that began in Fall 2021 and concluded Summer 2022.

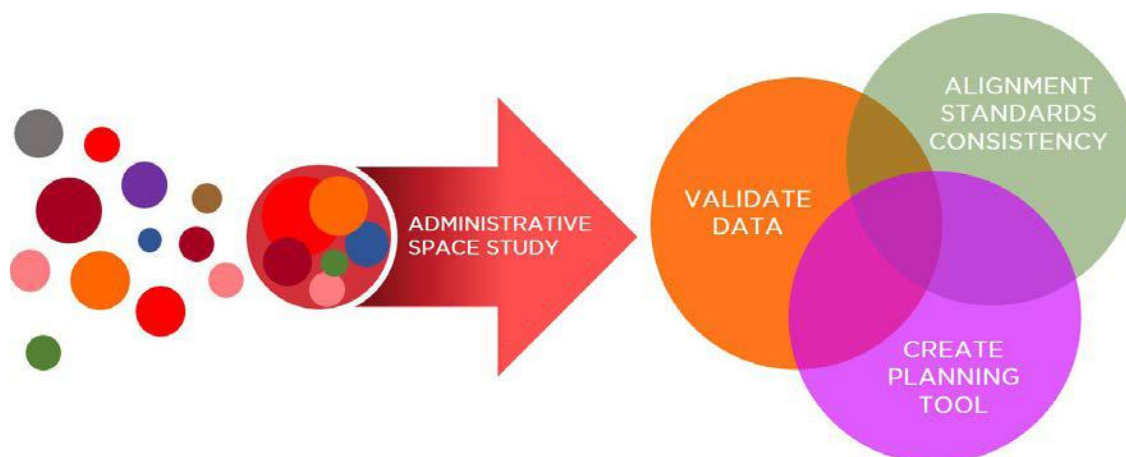

## Goals

The following goals and objectives were identified as significant to this study:

- Basic Information: who, what, where, how many, how much, etc.
- Summary highlighting each Division's space allocation
- Benchmark the CSU State University Administrative Manual (SUAM) to illustrate alignment or misalignment
- Observations with sample on-site observations with photo references
- Provides indicators that highlight potential and other opportunities

## Significant Findings

The analysis and evaluation of data to identify specific and universal needs were a part of this list of queries:

- How do current spaces impact functionality, programs and services?
- Where are there challenges and opportunities?
- What works well?
- Potential synergy and relationships with other Divisions/Departments may affect space, function and operations – are there desired intersectional opportunities or efficiencies?
- How has change impacted space utilization?

## Findings Summary

The following are consistent discussion points based on SUAM standards and existing conditions. For more information pertaining to each Division, refer to Division Observation and Findings in the following section.

- Various spaces throughout majority of buildings and Divisions are inconsistent with SUAM standards, or require additional information to conclude compliance.
- Coyote Bookstore - First Floor is vacant and available for new programs and services.
- Pfau Library presents opportunities for re-planning that factors in next generation library concepts, which in turn may offer more real estate for Administrative spaces.
- Sierra Village presents challenges for future work, including complex deficiencies with the existing structure and utilities.
- According to PDC staff, there are various needs for expansion and other space types to better serve their campus.

# Division Observations and Findings - San Bernardino

*The following narratives are approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site assessment with Facilities Planning & Management.*

## Academic Affairs

Academic Affairs serves many programs and departments, including faculty and staff.

A commonality throughout the Division are spaces not utilized to their fullest potential, according to the SUAM standards. For example, offices with larger square footages are only accommodating a single or few professional staff members. As noted in the Space Inventory summary spreadsheet located in the Appendix, discrepancies with SUAM standards are noted with the recommended number of occupants. In some instances for spaces classified as Other Office, the use of the spaces were not clear and was noted with the recommended number of occupants, based on the number of professional staff it will accommodate. Spaces were also noted in the Space Inventory Summary Spreadsheet where there are staff members occupying too low of square footage, mainly in the John M. Pfau Library and University Hall.

## Administration and Finance

A commonality throughout the Division are spaces not clearly noted as to how the space is currently being occupied. For example, in Administrative Services and University Hall, there lacks clear indicators for how the space is actually being used. For assessment purposes, these spaces were assessed based on the current square footage and how many professional staff members the space can accommodate.

## Information Technology

A commonality throughout the Division are spaces not clearly noted as to how the space is currently being occupied. For example, in Chaparral Hall and John M. Pfau Library there are not any clear indicators for how the space is actually being used. For assessment purposes, these spaces were assessed based on the current square footage and how many professional staff members the space can accommodate.

## President's Office

A commonality throughout the Division are spaces not clearly noted as to how the space is currently being occupied. For example, sporadically through Administration and Santos Manuel Student Union buildings there are not any clear indicators for how the space is actually being used. For assessment purposes, these spaces were assessed based on the current square footage and how many professional staff members the space can accommodate. There are also only two small offices being occupied in the Library by Ombuds & Gender Equity. Due to these being the only offices within the President's Office Division, perhaps these offices would be better utilized near other President's Office spaces.

## Student Affairs

A commonality throughout the Division are spaces not clearly noted as to how the space is currently being occupied. For example, sporadically through the Health & Physical Education Complex and University Hall there are not any clear indicators for how the space is actually being used. For assessment purposes, these spaces were assessed based on the current square footage and how many professional staff members the space can accommodate. There is also a large amount of Miscellaneous and Other Offices throughout, due to the flexibility of the space type and function. Serrano Village is not factored due to the current state of the facilities. Some buildings that clearly are specialty buildings, such as the Health Center, occupant accommodation is indicated even though the space use is not clearly indicated.

# Division Observations and Findings - San Bernardino

## University Advancement

A commonality throughout the Division are spaces not clearly noted as to how the space is currently being occupied. For example, sporadically through Administration building there are not any clear indicators for how the space is actually being used. For assessment purposes, these spaces were assessed based on the current square footage and how many professional staff members the space can accommodate. There is also only one support space being occupied in the Meeting Center under Special Events & Guest Services. Due to this being the only University Advancement space in the Meeting Center, perhaps this one space would be better utilized near other University Advancement spaces.

## Division Observation and Findings - Palm Desert

*The following narratives are approximate based on assessed plans, documentation, and minimal on site assessments. For current conditions, please coordinate on-site assessment with Facilities Planning & Management.*

*Campus has noted the need for more space for current needs and future expansion. Refer to Other Considerations section for more information on campus needs.*

### Academic Affairs

In addition to the overall campus needs, the one support space is accommodating one staff, when it has the capabilities to accommodate ten staff members. Confirm if this is an area of opportunity to locate an additional staff member.

### Information Technology

In addition to the overall campus needs, the only space of mild concern is an open office space that can accommodate two staff members instead of the one noted. Confirm if this is an area of opportunity to locate an additional staff member.

### Student Affairs

According to the current room assignments, there are no discrepancies in the occupied spaces. The only suggestion would be if there is an opportunity to relocate the single office in the Indian Wells Center for Excellence to another building where other Student Affairs spaces are being occupied.

### University Advancement

According to the current room assignments, there are no discrepancies in the occupied spaces.

# Division Observations and Findings - San Bernardino

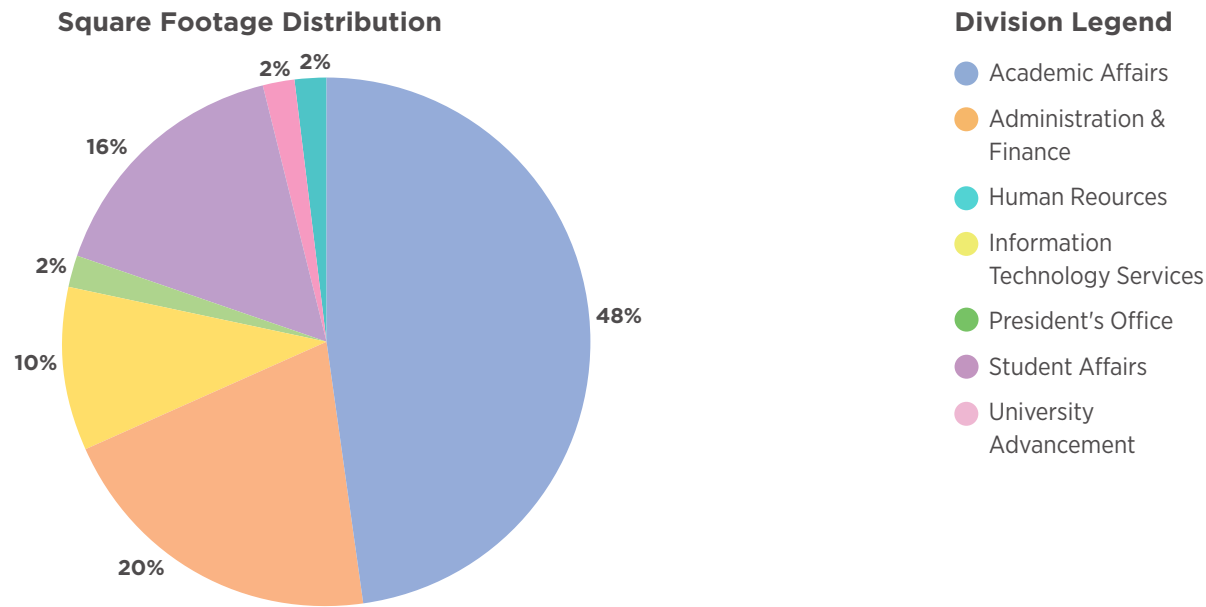

Chart is developed based on Administrative spaces only, and is being illustrated by percentage of the overall amount of Administrative spaces.

\*Represents administrative spaces used for various program services

# Division Observations and Findings - Palm Desert

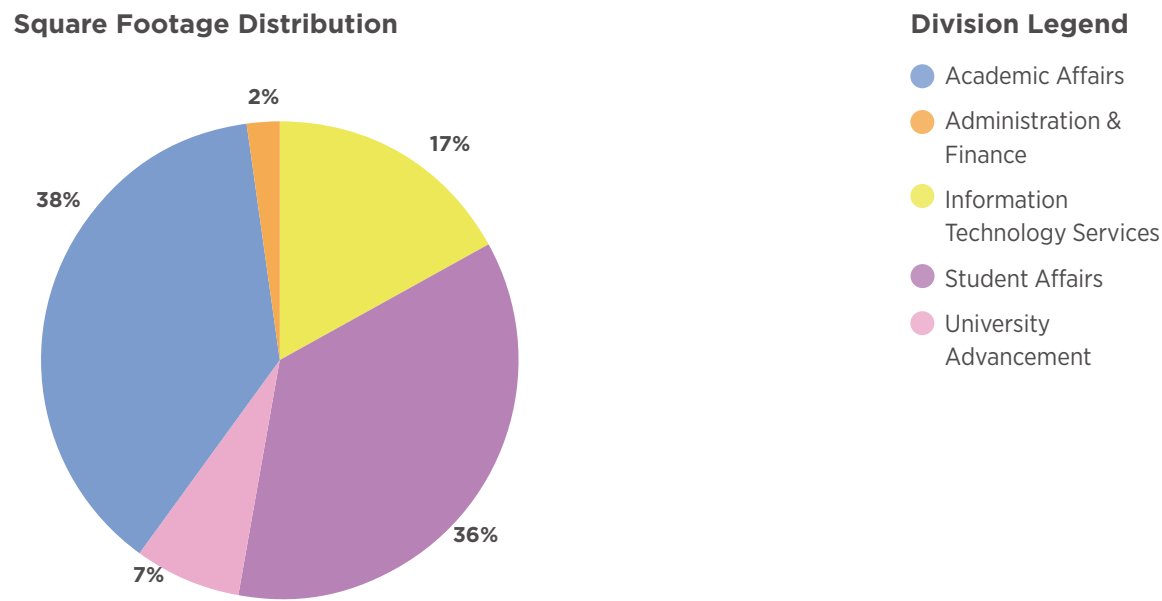

Chart is developed based on Administrative spaces only, and is being illustrated by percentage of the overall amount of Administrative spaces.

## References

**2.0**

## 2.1 Administrative Space Types

Information to follow has been extracted from the Space and Facilities Data Base Management System User's Manual - Information Support Section - Sub-divisions A. Office and D. Miscellaneous. Information extracted has been used to categorize spaces in the Building Assessment for each division.

### Faculty/Admin - Professional 0035

**Definition:** An office allocated to faculty members with administrative responsibilities. Also space allocated to administrative officers with responsibilities related to the instructional program.

**Description:** This category includes the offices of deans, department and division chairmen, and the Office of the Chief Instructional Officer (e.g., the Dean of Instruction). If doubt exists as to whether a space should be classified as Faculty/Administration or Administration, refer to campus operating budget. Positions listed under instructional-support should be classified as Faculty/Administration. Positions listed under administration should be classified as Administration.

**Limitations:** This category does NOT include such spaces as should be classified as Faculty Offices or Administrative Offices.

### Faculty/Admin - Support 0036

**Definition:** Space occupied by staff members who directly serve the faculty members with administrative responsibilities, as well as those who serve administrative officers with responsibilities related to the instructional program.

**Description:** This category includes clerks, technicians, supports, receptionists, etc. Space allocated for technicians, shop, warehouse, and other materials processing personnel, may also be included if it is in the nature of an instructional office.

**Limitations:** This category does NOT include such space allocated for materials processing personnel if it is a work preparatory station. Such space should be described under the instructional discipline or the instructional-support unit controlling it.

### Faculty/Admin - Services 0037

**Definition:** A room which directly serves a Faculty/Administration office as an extension of the activities that take place there.

**Description:** This category includes such areas as file rooms, office supplies, duplicating, mail handling, and personnel interviewing. It also includes other auxiliary rooms, such as vaults, restrooms and internal corridors within Faculty/Administration suites.

**Limitations:** This category does NOT include office service related to administration or other central areas serving the whole campus such as centralized mimeograph and printing shops.

## 2.1 Administrative Space Types

Information to follow has been extracted from the Space and Facilities Data Base Management System User's Manual - Information Support Section - Sub-divisions A. Office and D. Miscellaneous. Information extracted has been used to categorize spaces in the Building Assessment for each division.

### Faculty Office - Professional 0030

**Definition:** A space for desks, office stations, etc of faculty members.

### Faculty Office - Support 0031

**Definition:** A space occupied by staff directly supporting instructional faculty activities.

**Description:** This category includes space occupied by clerks, technicians, support, receptionists, and other staff.

**Limitations:** This category does NOT include rooms generally referred to as faculty offices.

### Faculty Office - Service 0032

**Definition:** A space that directly serves faculty offices as an extension of the activities that take place there.

**Description:** This category includes such areas as file rooms, office supplies, duplicating rooms, mail handling, personnel interviewing, and reading rooms; it also includes vaults, closets, record rooms, and private restrooms.

**Limitations:** This category does NOT include office service related to administration or other central areas service the whole campus such as centralized copy centers.

### Administration - Professional 0040

**Definition:** An office space which serves as the primary work area of any person assigned as an administrative position including organized activities, student services and staff benefits, maintenance and operation of plant, and general administration.

**Description:** This category includes directors' offices, dean of students, dean of housing, head librarian's offices, business offices, personnel offices, counselors' offices, coordinators' offices, admissions offices, registrar's and business manager's offices, President's and Vice President's offices, alumni offices, supervisors' offices, security offices, etc.

If doubt exists as to whether a space should be classified as Administration or Faculty/Administration, refer to your operating budget. Those positions listed under administration should be classified as Administration. Those listed under instructional support should be classified as Faculty/Administration.

### Administration - Support 0041

**Definition:** A space occupied staff who directly serve the administrative personnel.

**Description:** This category includes clerks, technicians, admin, receptionists, typists, etc. Space allocated for technicians, shop repairmen, warehousemen, and other materials processing personnel may also be included if it is in the nature of an administrative office.

**Limitations:** This category does NOT include space allocated for materials handling personnel if it is a work preparatory station. Such space should be described under the instructional discipline or the instructional-support unit controlling it.

## 2.1 Administrative Space Types

Information to follow has been extracted from the Space and Facilities Data Base Management User's Manual - Information Support Section - Sub-divisions A. Office and D. Miscellaneous. Information extracted has been used to categorize spaces in the Building Assessment for each division.

### Administration - Services 0042

**Definition:** A room which directly serves an administrative office (or group of offices as an extension of the activities in that office [or group of offices]).

**Description:** This category includes file rooms, vaults, waiting and reception rooms, interview rooms, closets, private restrooms, record rooms, supply and storage rooms, lockers and shower rooms, testing rooms, reading rooms, general purpose rooms, conference rooms, duplicating rooms, mail rooms, coat rooms, work rooms, dark rooms, equipment rooms, etc. This category also includes centralized copy centers.

**Limitations:** This category does NOT include an service areas that serve a Faculty/Administrative office.

### Other Office 0049

**Definition:** Offices not readily classifiable under specific office areas.

**Description:** This category includes physician examining rooms in Health Services, counseling-therapy rooms, campus lab school teaching offices and coaching offices.

**Limitations:** This category does NOT include offices readily classified under other office categories.

### Conference Room 0051

**Definition:** A space used for meetings rather than regularly scheduled classes.

**Description:** This category includes rooms typically equipped with a large table and chairs and used as a general purpose meeting room. Although it may be assigned to a specific organizational unit, it is used primarily by groups for general purposes such as department meetings, student government, and administrative conferences.

**Limitations:** This category does NOT include lecture rooms.

### Administrative Use 0092

**Definition:** To be used only when administration space cannot be reasonably categorized elsewhere.

### Other General Office 0099

**Definition:** To be used only when space cannot reasonably be categorized elsewhere.

## 2.2 SUAM Administrative Office Standards

The square footage below allocated for a standalone office for professional staff, one occupant (faculty or other) is 110 ASF as shown below. For planning with the balance, or cumulative balance for multiple offices, used for conference rooms, workroom/copy rooms, etc. It does not include storage, as that is calculated separately.

Position and Number of Occupants	Square Feet
Campus President	300
Vice President or Dean	200
Associate Dean, Division Chairman, Associate Vice Library Director	180
Department Head or Librarian	150
Professional Staff	
• one occupant (faculty or other basic)	110
• two occupants	160
• three occupants	240
• more than three occupants in same office	240 + 80 for each added occupant
Secretary or Receptionist	160
Clerical or Technical Support Staff	
• two occupants	160
• three occupants	230
• more than three occupants in same office	300
Student Assistant	60
• five or more	300 + 75 for each added occupant

## 2.3 Other Considerations

Areas of concerns throughout both Cal State San Bernardino campuses that include but are not limited to space needs and challenges, room for expansion, and under utilized spaces. For more information regarding the current Space Inventory Summary and use of spaces, refer to Appendix.

### Pfau Library - Future Use and Considerations

There are areas for future opportunities throughout the library, specifically in the existing book stack sections on the third, fourth, and fifth floors. Due to the condition of the under-utilized spaces at the moment, it offers prospects to streamline and create new settings to enhance current workflow for staff, faculty, and students.

Below is a list of potential considerations for future planning:

#### Staff/Faculty Offices

- Provide hotelling or touchdown spaces for adjunct faculty to work.
- Provide meeting spaces for staff and faculty of any level to collaborate in-person.
- Provide space for faculty to reserve and conduct remote learning, typically the size of a small office.

#### Student Services and Learning Spaces

- Allow for space to conduct tutoring, counseling, and any other interactive settings, such as tables and chairs.
- Provide soft seating to allow for flexible study options.
- Integrate study and soft seating spaces throughout the book stacks for more convenient access.
- Allow space for computer access, both desktop access, and docking stations for students with their personal mobile devices.

#### Multi-Use Spaces

- Explore opportunities for flexible use collaboration for staff, faculty, and students with equal access to.

#### Potential Scenarios

*\*Assessments are approximate and for reference only. Numbers listed indicate if space was fully occupied with either all private offices or all workstations. Private offices are assessed at 110 square feet, and workstations are assessed at 70 square feet. Circulation accounts for 25% of assessed square footage.*

- Area A (applicable to Floor 5 only)  
66 Workstations  
42 Private Offices
- Area B (applicable to Floors 3, 4, & 5))  
23 Workstations  
14 Private Offices

Assessment Area A  
Approximately 6,227 sf

Assessment Area B  
Approximately 2,162 sf

Fifth Floor (for reference only)

## 2.3 Other Considerations

Areas of concerns throughout both Cal State San Bernardino campuses that include but are not limited to space needs and challenges, room for expansion, and under utilized spaces. For more information regarding the current Space Inventory Summary and use of spaces, refer to Appendix.

### Serrano Village - Future Use and Considerations

Due to the conditions of the existing buildings, there are many factors to consider.

Below is a list of potential considerations and concerns for any future work:

#### Existing Conditions and Concerns

- Buildings were constructed between 1973-1977.
- Buildings will need to be brought up to current codes and ADA compliance.
- Major termite damage throughout location, including structural integrity.
- Galvanized pipes resulting in water that is not usable.
- Roof damage requiring abatement.

#### Staff/Faculty Offices

- Explore opportunities to convert existing dormitory rooms to private offices and conferencing areas, only if more housing is not needed.

#### Student Dormitories

- Based on future housing needs, the site will need to be evaluated based on needs outlined in the Master Plan.

#### Reference Photos

Exterior

Ceiling Damage

## 2.3 Other Considerations

Areas of concerns throughout both Cal State San Bernardino campuses that include but are not limited to space needs and challenges, room for expansion, and under utilized spaces. For more information regarding the current Space Inventory Summary and use of spaces, refer to Appendix.

### Coyote Bookstore - Future Use and Considerations

First floor is currently vacant and the University is exploring potential new programs here, while the basement section is occupied by the Veteran Success Center department. Options include, but are not limited to, leave the space currently occupied by Veteran Success Center in the basement As-Is, and renovating the first floor to accommodate new programs and services.

Below is a list of recommendations and considerations:

#### Student Services

- Convert entry portion of the first floor into a Welcome Center.
- Provide areas of gathering for both everyday use, and for "on-demand" utilization through flexible furnishings and equipment.
- Keep Welcome Area open and flexible to allow for multiple types of uses throughout the year.

#### Meeting Spaces

- Utilize existing structure to divide the space into multiple settings, which will offer flexibility to accommodate a wide spectrum of activities.

#### Potential Scenarios

*\*Assessments are approximate and for reference only. Numbers listed indicate if space was fully occupied with either all private offices or all workstations. Private offices are assessed at 110 square feet, and workstations are assessed at 70 square feet. Circulation accounts for 25% of assessed square footage.*

- Area (approximately 7,542 sf)  
80 Workstations  
51 Private Offices

#### Reference Photos

Interior

Interior

## 2.3 Other Considerations

Areas of concerns throughout both Cal State San Bernardino campuses that include but are not limited to space needs and challenges, room for expansion, and under utilized spaces. For more information regarding the current Space Inventory Summary and use of spaces, refer to Appendix.

### Palm Desert Campus - Current Space Needs and Challenges

A major concern the campus faces is the need for more space. While there are some solutions in progress, a long term interim solution will need to be explored and considered.

Below is a list of issues or concerns regarding space management:

#### Staff/Faculty Offices

- Professionals are sharing offices (admissions and associate dean office).
- Employees who usually have private offices work in open spaces at Palm Desert.
- Faculty and staff members cannot be strategically located in coherent clusters due to limited space.
- Space shortage could delay the hiring of future Palm Desert tenure-track faculty members, or limit garnering more department and program support.
- University Advancement needs a Palm Desert office to house its grant writer.

#### Student Services

- Three admission and enrollment staff members share only two offices with one of them converted from a small storage without a window.
- Career Center has only one small office, but needs space to expand its services.
- Palm Desert plans to offer additional student services, e.g. GEARUP and EOC, both require dedicated spaces.

#### Student Learning Space (outside of classes)

- Palm Desert student union and ASI share a small office limiting their services.
- Staff supporting undocumented student need private office, Palm Desert plans to dedicate one.
- Students have very limited spaces to support learning outside of classrooms (such as collaborative stations, small group discussion rooms).
- Campus does not have student club space.

#### Storage

- Traditional storage space is very limited and one of them is used to house the Salton Sea Collection.

#### Academic Delivery

- Campus has enough classrooms for a few more hundred students.
- Campus could use more lab space to support classes.
- More open lab space will be a plus.
- Campus does not have large size (100+) classrooms.
- Campus needs spaces to house academic programs (e.g. social work)

Research

3.0

## ADMINISTRATIVE SPACE PLANNING: WORKPLACE PLANNING & DESIGN CONSIDERATIONS

Why, how, when, and where we work matters. And workplace design needs to keep pace with employee needs and the evolving nature of work. With an understanding of the behavioral and value shifts that have taken place, both before and during the COVID-19 pandemic, thoughtful workplace design can address the changing needs of all stakeholders – at the individual, departmental, and campus/organizational level. This research brief summarizes recent workplace design research, some forecasted trends, and important factors to consider for educational administrative space planning. Employee performance levels are deeply impacted by their work environment. Successful workplace design not only supports employees' performance across a range of work functions and activities, but it also aims to enhance health and well-being, while meeting occupant satisfaction, individual needs, and personal preferences. Employee satisfaction with their work environment has been found to be distinctly correlated to engagement and productivity. However, there's no "one-size-fits-all" solution for faculty offices or other campus workspaces.

### THE EVOLUTION OF WORKPLACE DESIGN

For decades, research has highlighted common office challenges related to noise distractions, privacy, and static workstations. During the pandemic, remote employees had an opportunity to better understand the qualities of their immediate work environment and became increasingly aware of these persistent workplace challenges. Reasons for re-examining workplace physical environments are both operational (e.g., optimize real estate utilization, adapt to changing needs, control costs) and strategic (e.g., drive innovation and creativity, break down departmental silos, improve employee engagement). Steeped in institutional tradition, though, academia can be slower to change. However, the pandemic has accelerated the implementation of many

trends already seen in the evolution of workplace even before this shared global experience in terms of why, how, when, and where we work.

### RE-ENVISIONING THE WORKPLACE

The remote work experience demonstrated the feasibility of alternative work models and increased the demand for workplace design that supports employee wellness, user experience, and organizational culture/community. With greater understanding of how employees' workspaces facilitate or hinder their ability to accomplish role-specific work tasks, the pandemic has provided an opportunity to reimagine workplaces with a renewed and amplified interest in agile workplaces, distributed teams, hybrid work models, activity-based design, and balancing visual, territorial, and acoustical privacy with the need for collaboration space.

**ABOVE:** Blended environments with private offices, open workstations and touchdown shared spaces.

### RETURNING TO THE WORKPLACE

As employees are returning to office environments again, whether full-time or in a hybrid capacity, they are bringing the strengths of more agile physical and digital work practices. Employees prefer to have a variety of spaces to choose from that are functional for the task at hand, support a range of independent and group activities, and provide the right level of privacy and comfort. Equally important is the need to incorporate technology infrastructure that brings together distributed employees in new ways and promotes collaboration inclusive of both in-office and remote team members.

The following sections focus on employee wellness, experience, and organizational culture/community considerations in workplace design and campus facilities planning. Each section addresses overarching considerations, based on research and best practices, as well as relevant planning priorities and implications specific to educational workspaces, based on lessons learned during the pandemic.

**“Access to nature in working environments is directly related to heightened job satisfaction and lower levels of stress.”**

(Center for Active Design, 2019)

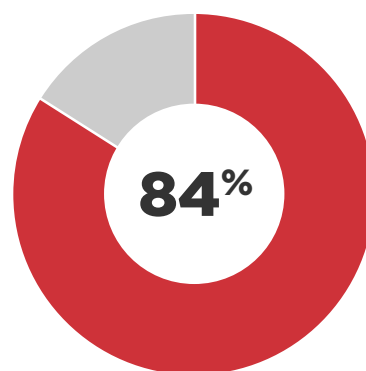

### DESIGN FOR WELLNESS

Pre-pandemic research demonstrated that organizations that invest in their employees' well-being also strengthen their engagement, commitment, and loyalty to the organization. Ultimately, happy workplaces result in lower absenteeism, presenteeism, and employee turnover, more creativity and innovation, and higher growth and profits.

#### LESSONS LEARNED DURING THE PANDEMIC – *Nature, Active Design, Restorative Spaces, Materials, & Cleaning*

During the pandemic, many employees had new insights about what they need in their work environment, especially pertaining to their physical, cognitive, and emotional well-being. These new insights have only heightened the importance of health and wellness

in the workplace. Numerous research studies have demonstrated a greater sense of well-being for remote employees, with the ability to access nature or views from their home desk, change postures (sit, stand, perch, lounge, etc.), work in an outdoor patio, take breaks to walk on trails or incorporate physical activity in other ways, cook healthy meals, and weave in activities that help to recharge and relax. The ability to focus and be productive at home was among the top five things that employees felt improved when working from home. And, many found a greater sense of psychological ease and physical comfort, especially when they had ergonomic and adjustable furniture.

**84%** of higher education planners surveyed said they are likely to make greater use of outdoor spaces over the next year (SCUP, 2021)

### ACADEMIC EMPLOYEE/OCCUPANT WELLNESS

Like the workforce in other settings, higher education employees and students are thinking more about ways the physical environment and access to nature can impact their health and wellness post-pandemic. One key strategy is the increased use of outdoor spaces on campus for a multitude of uses.

### DESIGN CONSIDERATIONS TO SUPPORT WELLNESS

The amplified importance of access to nature from the workspace, including natural light and fresh air, is likely to impact future expectations of biophilic design in workplaces, as people are more personally aware of the benefits, including reduced stress and improved cognitive function and productivity. In addition to improved well-being and health, physical and perceived safety have also attracted greater attention since the pandemic. A focus on improved air quality, ventilation rates, adherence to safety protocols, and general facility cleanliness rank among the most important health and safety considerations for workplace planning and design. The use of physical boundaries for social distancing and

reduced density of people in the building, to minimize illness and disease transmission, are also likely to have long-lasting design implications.

#### ACCESS TO NATURE / BIOPHILIC DESIGN

Biophilic design is an important evidence-based strategy for supporting occupant health, well-being, and cognitive performance in the workplace by connecting building occupants with nature. Benefits of biophilic design include buffered stress and reduced fatigue as well as improved concentration, attention, comfort, and sense of safety.

##### Views

- Configure desks so all employees have a view to the outdoors from their workstation. Research has shown brief breaks to view nature from the workstation can help reduce attention fatigue, decrease stress, boost satisfaction and well-being, and improve memory.
- Aim for unobstructed views to natural elements, such as water, trees, parks, plazas, and rooftop gardens.

##### Daylighting

- Design for an abundance of natural light that minimizes glare and shadow, as it improves cognitive function and productivity.
- Use operable shades to allow individuals to control their own lighting comfort levels, which has a positive impact on health and well-being.

##### Nature / Natural Elements

- Provide multi-sensory experiences for occupants, such as plants and greenery inside to increase occupants' proximity to nature or incorporating water features and bird song.
- Use spatial arrangements that simulate the natural world, such as cozy nooks offering seclusion.
- Include natural materials, shapes inspired by nature, and patterns found in nature (e.g., fractals and shadows silk screened on window shades or space dividers).

##### Fresh Air / Air Quality

- Specify HVAC systems that control temperature, humidity, filtration, air dilution and air movement. Increased outside air change rates, temperature control, and better filtration have a positive impact on health, comfort, and well-being.
- Include operable windows to provide access to fresh air and increase occupant sense of control.

- Use hard or fabric barriers and space dividers (e.g., workstation screens) to reduce airborne pathogens in locations where there is higher foot traffic.
- Increase occupants' perception of health and safety using spatial strategies, such as configuring desks to minimize face-to-face orientation (especially where there are no barriers/dividers).

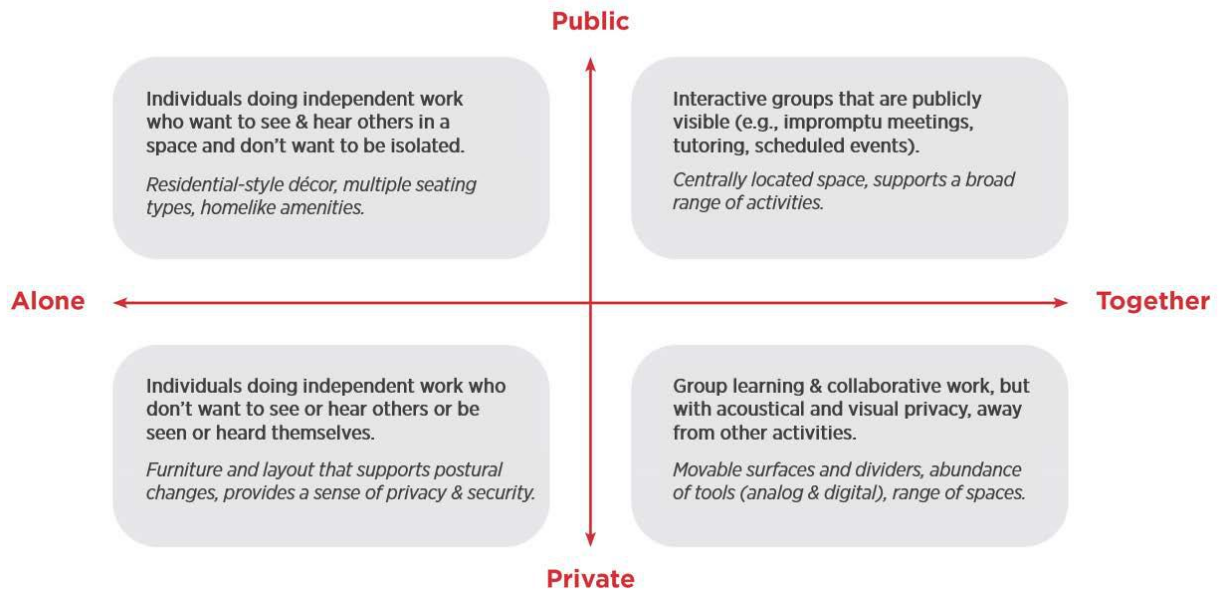

#### Outdoor Spaces for Focus and Collaboration

- Incorporate outdoor spaces that are high-performing, functional, and designed to accommodate a variety of uses (e.g., dining, social gatherings, small- to medium-sized group meetings, collaboration, presentations, brainstorming, and/or productive focused work) with access to power and Wi-Fi.
- Use folding glass window walls or roll-up doors to blend indoor and outdoor environments and increase accessibility.
- Furnish the outdoor spaces with a range of seating, writable surfaces, and reconfigurable furniture.
- Consider the need for privacy for independent work and/or confidential conversations by utilizing greenery to delineate zones for different uses, from work to social to respite.
- Provide outdoor relaxation and restoration spaces, such as terraces, courtyards, public gardens, rooftops, patios, and porches.

#### ACTIVE DESIGN

During the pandemic, working from home enabled people to move around in their environment to work in different locations (desk, couch, kitchen table, outdoor patio), with greater accessibility to take walks outside during virtual meetings and breaks. Improved occupant health, well-being, and work/life balance are linked to decreased presenteeism (i.e., "showing up" to work but not being productive) and absenteeism, which are both costly to employers.

- Use active design strategies and signage to promote walking and other physical activity accessing prominent social stairs and stairwells with natural lighting/views.
- Encourage movement and more active meetings in shared spaces using a variety of seating and postural support for a range of work tasks and tools.
- Offer access to walking trails/paths nearby to help maximize exposure to nature and encourage active breaks outdoors.

**ABOVE:** Considering a variety of spaces with different levels on the two continuums of public-private and alone-together will help address occupants' psychological well-being.

#### OFFICE DENSITY AND RESTORATIVE SPACES

Perhaps one of the most valued aspects of remote work is the increased privacy and access to informal/comfortable environments, which reportedly allowed employees to decompress and contributed to better emotional and stress management.

- Implement restorative spaces to relax, recharge, rejuvenate, and re-energize around others, with different levels of public-private and alone-together (see Figure above).
- Offer quiet and/or immersive break spaces with ambient sounds found in nature, nature-inspired imagery, or other multi-sensory experiences.
- Include a range of comfortable spaces and furnishings to enable individuals to address their physical, emotional, and cognitive needs (e.g., a break from visual, acoustic, and territorial distractions) – as they were able to when working in their home environment.
- Reduce office density to minimize a sense of crowding, which has negative impacts on employee focus, performance, engagement, and well-being. Providing flexible layouts can accommodate fluctuating density requirements and needs.

#### MATERIALS, CLEANING AND MAINTENANCE FOR HEALTH AND SAFETY

While health promotion and disease prevention have become a primary concern in shared and public spaces, strategies to maximize perceived safety are just as important as the transition of students, faculty and staff back to campus. If occupants feel unsafe in a space, they will be more distracted and less likely to perform at their best.

- Use signage to promote personal hygiene and make cleaning highly visible during work hours to assure employees that spaces are being cleaned regularly.
- Increase the service life of furnishings, flooring, and equipment by specifying durable materials and smooth surfaces that are easy to clean and disinfect without degrading over time due to frequent cleaning.
- Introduce touchless technology for doors, faucets, room scheduling, elevators, and check-in to minimize illness transmission via contaminated surfaces.
- Consider sensor technology to understand and control occupancy and to determine appropriate cleaning frequency based on where, when, and how often spaces are being used.

- Incorporate green and healthy building strategies by selecting materials with health product declarations (HPDs) and/or environmental product declarations (EPDs).
- Include design strategies from green and healthy building rating systems (e.g., LEED, Fitwel, WELL Building) to promote occupant health, safety, and welfare.

**“...shifting worker priorities, behaviors and tendencies in work life considerations is creating the opportunity for us to revise the lesson plan for office design.”**

*(Rudy & Foster, 2022)*

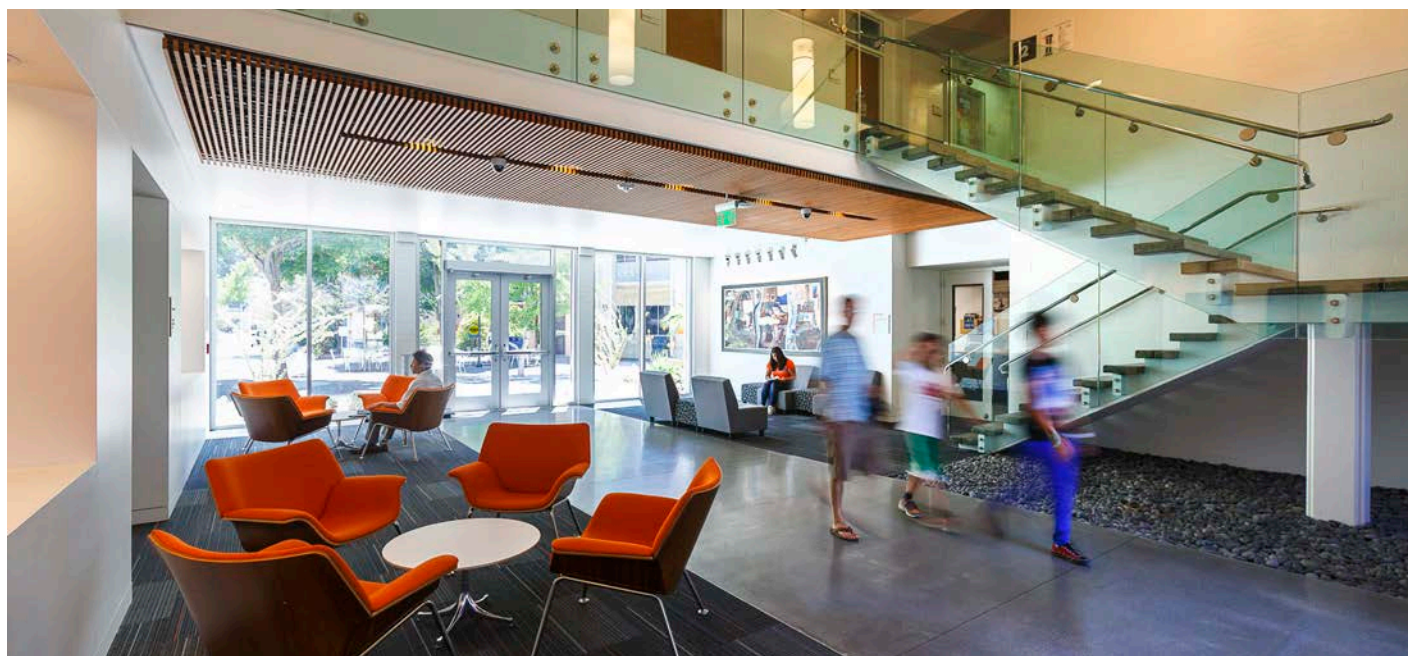

## DESIGN FOR EXPERIENCE

For employees to do their best work, they need workplaces designed to provide a positive human experience. To create an optimal workplace experience, it is essential to think about how each design decision might impact occupants' feelings and behaviors in the space, use and movement through the space, and engagement/interaction with the space/design features and other occupants.

### LESSONS LEARNED DURING THE PANDEMIC – *Flexibility, Collaboration, & Engagement*

Many environmental qualities that previously supported employee engagement became a greater priority during the pandemic, especially innovative ways to use outdoor spaces, improvements to indoor air quality, and access to daylight, views, and other biophilic design strategies. Additionally, when working from home, people found they had more control navigating their workday, compared to when they are working in the office. This newfound sense of control over their immediate environment and choice of when and where to work (e.g., dedicated office, sofa, outside workspace) has provided better work/life balance and stress management. With greater autonomy, most people have realized greater productivity. This customization allows employees to take breaks when needed and alter their environment to increase or decrease their stimulation, ultimately impacting their work performance. Moving

**BELOW:** Transitional space for faculty, staff or students to connect and engage.

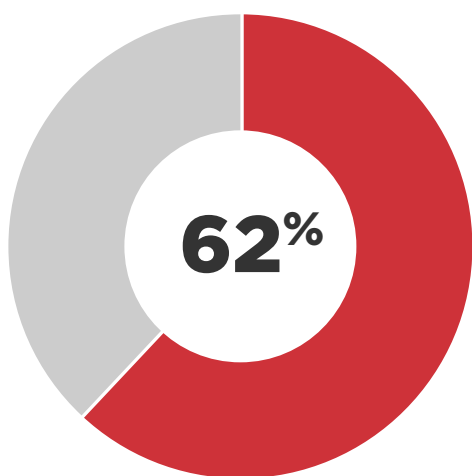

forward, employees want to be able to retain these benefits, while leveraging offices for specific activities, tasks, tools, and resources.

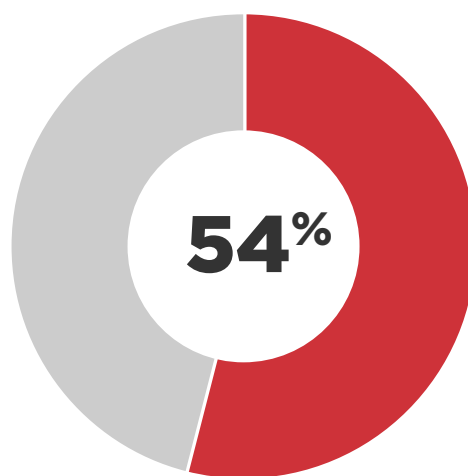

#### ACADEMIC EMPLOYEE/OCCUPANT EXPERIENCE

As people are returning to campus, after spending time away during the pandemic, many are thinking more about ways the physical environment can impact the employee/occupant experience, with a shift toward greater flexibility, agility, and efficiency. The key is planning and designing for the full range of current and future occupants (see sidebar).

The need for private or assigned academic offices is being re-evaluated, due in part to technology and collaboration tools that have enabled most academic tasks to be done from any location. In addition, offices make up a high percentage of campus real estate but have low utilization. Some faculty only come to campus on teaching days, and the proportion of part-time and contingent faculty has continued to increase. Since these offices are underutilized yet costly to build, heat, cool, and power, college and university planners are starting to allocate more office square footage to shared, community-building, respite, and social/gathering spaces that offer more options and choice.

**62%** of higher education planners surveyed said they plan to create more unassigned or flexible office space for STAFF in the next year (SCUP, 2021)

**54%** of higher education planners surveyed said they plan to create more unassigned or flexible office space for FACULTY in the next year (SCUP, 2021)

**Many campuses are shifting the ratio of private to shared space in favor of a wider variety of flexible spaces. As part of this shift, it is useful to consider questions like:**

- Should offices be grouped by department/discipline or distributed to intermix and increase collaboration opportunities?
- Which types of spaces can be shareable and who should share?
- Should all full-time tenure/tenure-track faculty have a private office? And are there generational preferences?
- How are faculty thinking differently about where they conduct research versus where they want to hold office hours with students or have breakout sessions with small groups.

#### DESIGN CONSIDERATIONS TO SUPPORT EXPERIENCE

Studies have shown that employees are more engaged when they are supported by, and more satisfied with, their workplace environment. Research on office space has generally found that a variety of open and enclosed, private and public spaces are most beneficial to give employees choice and control over their working environment and level of interaction with coworkers. The most widely accommodating work environments support personalization and individual needs, integrate technology for collaboration of team members across distributed locations, and provide flexible furniture. Studies have shown that people are better able to solve complex problems when they can move around in collaboration spaces and have movable tools such as digital technology, whiteboards, and pin-up capabilities. This is especially true when employees feel they have the permission and agency to adjust the arrangement of a space and the resources provided in it. When given choices about where and how they work, employees can better control their own experiences.

To foster healthy, happy, and creative employees, workplaces are now applying specific design solutions that education and healthcare facilities fast-tracked during the pandemic. Some of these strategies include curated outdoor environments, improved mechanical and electrical systems, and flexible and adaptable spatial layouts to encourage some level of choice and control.

#### ACTIVITY-BASED DESIGN

With less square footage devoted to private offices or private workstations and more allocated to shared and collaborative spaces, activity-based design is one way to support efficiency, productivity, performance, collaboration, innovation, and knowledge exchange.

- Reallocate private offices or underutilized office square footage to include a variety of shared spaces, including a balance of open, enclosed, and partially enclosed spaces to support a spectrum of activities.
- Encourage faculty to share an office and alternate the days they hold office hours to accommodate privacy and storage needs, while reducing the need for private offices.
- Integrate offices within learning environments and other places where students congregate. This helps facilitate student-faculty interactions (e.g., office hours with students in the library or student union or video conferencing from off-campus).
- Include touchdown space to get work done before and after meetings, as well as access to printers, whiteboards, storage, power outlets, Wi-Fi, and other shared resources.

**ABOVE:** Inspiring, flexible spaces designed to support a variety of postures and levels of privacy foster creative problem-solving, knowledge exchange, and innovation.

- Equip the common areas with power outlets, comfortable seating for informal meetings, and a variety of small tables for different sizes of groups. Research has demonstrated that the ability to efficiently switch between group and individual tasks leads to innovation.
- Locate spaces strategically in neighborhoods or zones for different levels of noise, lighting, and privacy to accommodate different work modes, teams, departments, and user groups. Brighter, more open spaces will signal more active zones versus secluded spaces with dimmer lighting.
- Consider hybrid-specific spaces and strategies, if applicable, including the ratio of assigned to unassigned desks, hybrid collabs, and single-person enclaves for hybrid meetings.

**“Organizations will need to rethink the purpose of the office from simply a place to work to becoming the infrastructure for building social capital and fostering a sense of purpose and belonging.”**

(Steelcase, 2021)

#### FLEXIBILITY, AGILITY, AND EFFICIENCY

Offer flexible spaces and furnishings that allow employees to adapt their work area to suit their needs and the task at hand (as space needs vary throughout a day, from day-to-day, and long-term). This will improve productivity and employee well-being.

- Install versatile architectural elements, rather than permanent walls, to allow building interiors to support a greater variety of uses (e.g., the ability to combine small adjacent meeting rooms, as needed). Adjustable boundaries enable greater personal choice for occupants to control their interactions, further contributing to psychological

**TOP:** Balance between private offices and open environments that provides visibility and encourages collaboration.

**MIDDLE:** Blended environments that build community and foster engagement.

**BOTTOM:** Flexible and seamless transitions between individual workspaces and group activities.

TOP  
5Reasons US Workers  
Want to Return to the Office

1

Reconnect with colleagues

2

Reconnect with the organization  
and shared purpose

3

Work in a quiet, professional  
environment

4

Collaborate in person

5

Access to paper and files

(Steelcase, 2021)

safety. When individuals are comfortable in their space and achieve their desired level of interaction, engagement is improved.

- Include adjustable-height desks within flexible spaces and opportunities for people to move/change postures between different work tasks.
- Specify easy-to-move furniture and resources, such as mobile whiteboards, digital displays, freestanding privacy screens, and tables or desks on casters (e.g., table shapes that easily nest together to create a larger surface when needed). This allows spaces to expand and contract to support distancing and accommodate groups of all sizes and individuals.
- Provide spaces that accommodate flexible work schedules and part-time employees with more unassigned/flexible office spaces, free-address/hoteling workstations, short-term landing spaces for work between meetings, and shared spaces that can be reserved, as needed. These spaces should include some acoustic separation and access to power.

### DESIGN FOR ORGANIZATIONAL CULTURE/ COMMUNITY

People want to work in a place that helps build a sense of community and belonging, and research has found that a strong organizational culture/community positively contributes to well-being and better business outcomes.

Aesthetically pleasing and inspiring workplaces have been shown to positively impact talent recruitment and retention. In addition, workplaces must be designed to help employees feel part of something bigger and a community they can contribute to.

### LESSONS LEARNED DURING THE PANDEMIC – *Connection, Belonging, & Communal Spaces*

After employees were physically separated during the pandemic, the need to feel connected to others and part of a community at work has grown in importance. The pandemic provided an opportunity to think more about how gathering spaces could facilitate community-building interactions on campus or in hybrid spaces. Global studies have shown that some of the top reasons employees want to return to the workplace are to reconnect with colleagues, to reconnect to the organization and a shared purpose, and for the camaraderie and in-person collaboration. (see “Top 5 reasons” graphic). Campus planners are expanding these considerations to also think about ways the physical environment can impact the broader campus community and its surrounding neighbors (e.g., public-facing and joint-use spaces) to create inclusive environments.

### ACADEMIC ORGANIZATIONAL CULTURE/COMMUNITY

Communities are typically characterized as location-based or interest-based settings that bring people and organizations together. Universities tend to define their campus community with both types of settings. Workplace communities are often designated by

**ABOVE:** Easy access to nature encourages use of alternative outdoor workspace and opportunities to bring fresh air into the building, especially with large movable glass walls.

location within a common building, floor, or zone. However, they can also be characterized by interest-based settings, like departments, schools, research groups, or other subgroups with shared interests within the broader university community. Research has shown that people's sense of community is greater when they have associations with smaller subgroups within the organization. Research has also found that campus spaces can be designed to increase the frequency of interactions (both planned and impromptu), which leads to more associations being formed within and between university subgroups. If those interactions are positive, they can enhance belonging and people's sense that they are an essential part of the campus community.

#### **DESIGN CONSIDERATIONS TO SUPPORT ORGANIZATIONAL CULTURE/COMMUNITY**

Research has confirmed that the sense of belonging is one of the top predictors for higher engagement, innovation, productivity, job satisfaction, overall well-being, and organizational commitment. Thriving workplace communities aim to have the following attributes, including spaces that (1) have leaders accessible and visible; (2) encourage gathering and social interaction; (3) promote calm and comfort; (4)

cultivate positive relationships among diverse groups; and (5) are inspiring and stimulating to foster creative problem-solving and innovation.

#### **CULTURE OF BELONGING**

- Foster trust and transparency by locating leaders' workspaces in visible and accessible areas for ease of communication between employees and leaders.
- Support teams collaborating and gathering in person and from distributed locations, as remote work is likely to continue to some degree and team members need to feel included regardless of their location.
- Consider people's diverse needs and workstyles, such as different physical abilities, neurodiversity, the range of introvert and extrovert personalities, and preferences for solo or group work. This idea of inclusivity, regardless of physical abilities or location, will help to create a sense of belonging which can further encourage organizational commitment and community.

- Encourage a sense of belonging using one or more design strategies that promote calm and comfort, such as soft neutral colors resembling nature; soft seating that supports relaxed body postures; occupant control of ambient temperature; choice among different levels of enclosure and privacy; a “community” wall or set of display nooks allowing individuals to exhibit personal items (e.g., family photos).

#### COMMUNAL SPACES

- Arrange communal spaces to help build a sense of community, provide social support, and create connection among staff, faculty, students, and visitors to nurture their network.
- Provide settings with a variety of interconnected neighborhoods or zones that naturally flow from one to another. This will further generate synergy among colleagues within and across teams.
- Include functional and comfortable communal spaces, with shared amenities and resources, to facilitate informal meetings, casual one-on-one conversations, relaxation, spontaneous interactions, and the exchange of ideas (see sidebar).

#### INSPIRING SPACES

- Create a vibrant workplace atmosphere, including some spaces that encourage liveliness, generate positive energy, inspire creativity, and promote a strong organizational culture. Design strategies include the use of color, high-volume spaces, varied textures and shapes, and bright natural light.
- Incorporate design elements that reflect and celebrate the campus and/or departmental communities’ shared values, priorities, and brand, which can inspire social responsibility and further increase the sense of belonging. Collective values and goals can include Environmental, Social, and Governance (ESG) standards, which demonstrate commitment to the environment, belief in social responsibility, and support of strong governance principles.

#### CONCLUSION

Higher education campuses are facing many changes, including flexible work environments, hybrid work and learning spaces, and new faculty and student insights about why, how, when, and where they work best. As 60% of 2021 Campus Facilities Inventory

#### These strategies can increase the use of communal spaces and inspire more frequent interactions:

- Offer task-oriented amenities like those found at individual workstations (e.g., digital displays, seating that supports a range of duration, etc.)
- Incorporate working surfaces and storage that supports both work and personal belongings
- Provide easily accessible power outlets or charging stations and Wi-Fi
- Create some level of visual, acoustical, and/or territorial privacy
- Design so that it is clear to users that they are allowed to modify the space or furniture to meet their needs, giving them control over their space
- Post signage that informs users about different ways the space can be used and configured for different activities
- Locate communal spaces near work zones and colleagues to help them stay connected
- Include destination spaces for use when people want to feel a sense of escape or being away

respondents reported that their campuses are likely to work on a master plan in the next year, college and university planners are asking the vital question, “How will higher education change?” There is a need to do things differently, and taking the time to translate what campus planners are hearing from stakeholders and the industry will help determine how best to implement necessary changes. Because it is still unclear what “the campus of the future” looks like, planners agree it is imperative to have a flexible planning framework. Rather than prescribing a standard or guideline with exact space allocations, many are simply focusing on establishing a direction with flexible parameters to best serve diverse campus community needs.

To make strategic campus planning decisions, it is crucial to have and use data about current facilities and space utilization. One recent and continuing source of data for benchmarking and campus planning is the Society for College and University Planning (SCUP) Campus Facilities Inventory (CFI). This annual data

is from a survey of colleges and universities about current space use as well as planned and anticipated facilities changes. Annual CFI reports provide a valuable resource for campus space planning efforts, allowing them to use the survey's findings and trends, including a data table sorted by institution type, size, and location (Donnelly, et al, 2021; SCUP & Brightspot Strategy, 2021).

## Contact for Additional Information

For any questions or further clarification on this research brief, please reach out to:

**KIMARI PHILLIPS** | EDAC, FITWEL AMB, WELL AP, CHES  
Research Manager | LPARED

Using workplace design research and lessons learned, as well as relevant implications for campus facilities planning, consider balancing design decisions with the following in mind:

### *Design for Wellness*

- Access to Nature
- Active Design
- Daylighting & Views
- Durable / Cleanable Materials
- Fresh Air / Air Quality
- Multi-Use Outdoor Spaces
- Natural Elements / Materials
- Restorative Spaces

### *Design for Experience*

- Activity-Based Design
- Collaboration
- Efficiency
- Engagement
- Flexibility / Agility

### *Design for Organizational Culture/Community*

- Belonging
- Communal Spaces
- Connection
- Inspiring Spaces

# Space Assessment

California State University, San Bernardino - San Bernardino Campus

4.0

## 4.1 Campus Map and Building Legend

## 4.2 Academic Affairs

### Description of Division services, mission, etc.

Academic Affairs provides leadership and support to California State University, San Bernardino's diverse student body and the faculty and staff who enrich and inspire them. Efforts are driven by the university's strategic plan and core values as well as CSU's system-wide initiatives.

### Building Assessment

For the purpose of this administrative assessment, spaces classified as either faculty offices will be documented separately for reference only. The following tables are approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management.

## 4.7 Student Affairs

### Description of Division services, mission, etc.

Nearly 20 departments make up the Division of Student Affairs, from housing to student engagement, career services to counseling, the student union to athletics, and so much more. Student Affairs enriches the Cal State San Bernardino experience outside of the classroom. This division engages students in activities in both the campus and surrounding community. Student Affairs offers support to students in need and creates an environment that enhances their experience and #LifeAtCSUSB.

# Appendix - Space Inventory Summary

Tables below indicate a space needs summary, itemizing each building with the type of space, quantity of space, and total square footage each space occupies. Tables are organized by Division, followed by Department, and Building. The following is approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management. Office ASF could differ from SUAM if occupied space was initially designed for non-office use.

# Appendix - Space Inventory Summary

Tables below indicate a space needs summary, itemizing each building with the type of space, quantity of space, and total square footage each space occupies. Tables are organized by Division, followed by Department, and Building. The following is approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management. Office ASF could differ from SUAM if occupied space was initially designed for non-office use.

# Appendix - Space Inventory Summary

Tables below indicate a space needs summary, itemizing each building with the type of space, quantity of space, and total square footage each space occupies. Tables are organized by Division, followed by Department, and Building. The following is approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management. Office ASF could differ from SUAM if occupied space was initially designed for non-office use.

# Appendix - Space Inventory Summary

Tables below indicate a space needs summary, itemizing each building with the type of space, quantity of space, and total square footage each space occupies. Tables are organized by Division, followed by Department, and Building. The following is approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management. Office ASF could differ from SUAM if occupied space was initially designed for non-office use.

# Appendix - Space Inventory Summary

Tables below indicate a space needs summary, itemizing each building with the type of space, quantity of space, and total square footage each space occupies. Tables are organized by Division, followed by Department, and Building. The following is approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management. Office ASF could differ from SUAM if occupied space was initially designed for non-office use.

# Appendix - Space Inventory Summary

Tables below indicate a space needs summary, itemizing each building with the type of space, quantity of space, and total square footage each space occupies. Tables are organized by Division, followed by Department, and Building. The following is approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management. Office ASF could differ from SUAM if occupied space was initially designed for non-office use.

# Appendix - Space Inventory Summary

Tables below indicate a space needs summary, itemizing each building with the type of space, quantity of space, and total square footage each space occupies. Tables are organized by Division, followed by Department, and Building. The following is approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management. Office ASF could differ from SUAM if occupied space was initially designed for non-office use.

# Appendix - Space Inventory Summary

Tables below indicate a space needs summary, itemizing each building with the type of space, quantity of space, and total square footage each space occupies. Tables are organized by Division, followed by Department, and Building. The following is approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management. Office ASF could differ from SUAM if occupied space was initially designed for non-office use.

# Appendix - Space Inventory Summary

Tables below indicate a space needs summary, itemizing each building with the type of space, quantity of space, and total square footage each space occupies. Tables are organized by Division, followed by Department, and Building. The following is approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management. Office ASF could differ from SUAM if occupied space was initially designed for non-office use.

MARY STUART ROGERS GATEWAY BUILDING / FIRST FLOOR

## 5.4 Student Affairs

### Description of Division services, mission, etc.

Nearly 20 departments make up the Division of Student Affairs, from housing to student engagement, career services to counseling, the student union to athletics, and so much more. Student Affairs enriches the Cal State San Bernardino experience outside of the classroom. This division engages students in activities in both the campus and surrounding community. Student Affairs offers support to students in need and creates an environment that enhances their experience and #LifeAtCSUSB.

### Space Inventory Summary Spreadsheet

Refer to Appendix for a more detailed spreadsheet indicating space numbers, square footage per space, and any additional comments.

# 5.6 Campus Defined

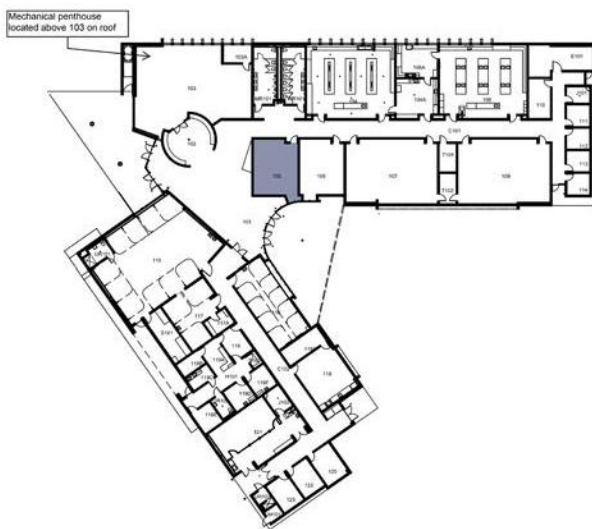

## Campus Plan

The colored circles graphically identifies occupied space representing the Division on campus. The campus site plan is approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management.

## Composite Floor Plans

Floor plans illustrate where office spaces are located within each respective building for this Division only. The following plans are approximate based on assessed plans, documentation, and minimal on-site assessments. For current conditions, please coordinate on-site and with Facilities Planning & Management.
