Master of Science in

LOGISTICS AND E-COMMERCE (MSLE)

PROGRAM OVERVIEW
The Master of Science in Logistics and E-commerce (MSLE) program provides post-baccalaureate students pursuing a career in logistics and e-commerce with a high-quality graduate education, aimed to train students to be experts in the specialty fields of logistics and e-commerce within the major field of supply chain management.

KEY DETAILS:
- Open to all qualified students regardless of undergraduate major.
- Program is delivered online in an accelerated format that consists of 10 courses (3 semester units each).
- Cohorts will start in each Fall and Spring semester.

Logistics and e-commerce are the backbones of the local economy in the Inland Empire. The university is surrounded by e-commerce and logistics organizations that are searching for qualified talented graduate students who can help in creating value. Inland Empire Quarterly Report published by the Inland Empire Economic Partnership, “the logistics industry added 53,000 new jobs in the region between 2011 and 2016, accounting for 23 percent of all jobs created in that period!
