Title

Web Development for Phi Beta Delta Honor Society

Student

KORAI Sheeraz Walid

Advisor

Dr. Haiyan Qiao

Abstract

For the last 20 weeks, under the supervision of Professor Qiao, I was responsible for the front-end development of the website. Front End Stack were HTML, CSS, JavaScript and Github was used for version control. Moreover, we had to ensure that the site was ADA compliant. We also used VS code, photo editor and xampp to aid in completing our tasks.
Currently, the team is waiting on the board of directors to review the website and see if the team has to make any further changes to the web page.
