

Campus Accessibility Guide

About This Guide

California State University, San Bernardino (CSUSB) offers a wide range of services to individuals with disabilities. This accessibility guide is designed to help individuals with disabilities navigate safely throughout the CSUSB campuses. Inside, you will find valuable information, including locations of accessible parking, exterior paths of travel and accessible entrances to building facilities, along with policies, emergency evacuation procedures, areas of refuge and descriptions of a wide range of facilities and services available to students, faculty, staff and visitors with disabilities.

Information contained in this guide is available online at <http://www.csusb.edu/campus-accessibility-guide>. Throughout this guide, you will find references to various offices and departments on campus that may be able to provide additional information. We encourage you to contact any of these offices directly with any questions or concerns you may have regarding policies or accessibility issues. Although we have made every effort to include the most up-to-date policies and information, individual policies, office hours and services may change from time to time. Offices and departments responsible for the services/policies in question will be able to provide the most current information, which supersedes the information contained within this access guide.

Mission Statement

The Office of Services to Students with Disabilities (SSD) strives to empower students with disabilities by fostering skills of self-advocacy, resourcefulness, and independence. The SSD office works collaboratively with the campus community to remove barriers and promote an enriched learning environment where students with disabilities can utilize their skills and pursue their academic and personal development goals.

Strategies include but are not limited to:

- Providing support services for students who have permanent or temporary disabilities;
- Advocating with and for individuals with disabilities on campus and in the community;
- Working for social changes;
- Promoting and coordinating systematic institutional initiatives for ensuring university programmatic and environmental access for individuals with disabilities;
- Distributing accurate information about disabilities; and,
- Serving as a resource for those who study the sociological, psychological, and environmental aspects of the culture of people with disabilities.

Disabilities that qualify for services may include: Learning; physical; deaf and hard-of hearing; visual and communication impairments; psychological and other functional limitations. In order to ensure appropriate accommodations, needs are assessed on an individual basis. Students seeking services from SSD must submit required documentation that verifies their disability; however, those students with a temporary physical condition (i.e., broken leg) can be visually verified by SSD staff and authorized services for up to one quarter.

Office Hours of Operation

During the regular academic year, SSD office hours are:

San Bernardino Campus

Monday - Thursday: 8 a.m. to 5:30 p.m.

Friday: 8 a.m. to 5 p.m.

Saturday: By appointment only

Palm Desert Campus

Monday - Thursday: 8:30 a.m. to 5 p.m.

Friday: 9 a.m. to 3 p.m.

During the summer, SSD office hours are:

San Bernardino Campus

Monday - Thursday: 7 a.m. to 5:30 p.m.

Friday, Saturday and Sunday: CLOSED

Palm Desert Campus

Monday - Thursday: 7 a.m. to 5:30 p.m.

Friday, Saturday and Sunday: CLOSED

**Testing and Mobility Services are available Monday through Thursday after hours and on Saturdays at the San Bernardino Office by appointment; please call for more information.*

***The SSD Office observes all campus closures.*

Mobility Services for Students

The San Bernardino SSD office provides drop-off and pick-up services via six-passenger, wheelchair-accessible electric carts that are available to qualified students with temporary or permanent disabilities. This is an on-campus service to transport students to and from designated pick-up points.

The Palm Desert SSD office provides drop-off and pick-up services in coordination with Parking Services via an electric cart to qualified students with temporary or permanent disabilities on a case-by-case basis.

To be eligible for this service, students must have a disability-related need. Registration with the SSD office and verification of disability are required before service can begin. Contact the SSD office to coordinate times and designated pick-up locations.

General Cart Transportation Assistance Policies and Procedures

San Bernardino Campus:

- Scheduled cart service is provided on a first come, first served basis, based upon submission of a Cart Service Request form.
- Unscheduled cart services are on an “on-call” basis and may be limited at times of heavy demand.
- Urgency of need, as determined by the SSD office, will dictate priority of use.
- Drivers will wait no more than 4 minutes at designated pick-up points for scheduled cart service.
- Students using this service must inform the SSD office at least 30 minutes in advance if they will not need cart services as arranged.
- Scheduled services will be suspended after two “no-shows” until the student confers with the SSD office.

Palm Desert Campus (PDC):

- The SSD office arranges cart transportation on an “on-call” basis, between the PDC and UCR Campus.
- The PDC-SSD Physical and Visual Disabilities Specialist will coordinate with Parking Services to determine the pick-up/drop-off locations and times.
- The cart transportation will be provided by a parking attendant.

High Wind Conditions

In the event of strong winds at either campus, it may be necessary to lock all north facing doors for the students’ safety. If this is the case, the cart transportation services for students on the San Bernardino Campus will continue uninterrupted. If required, the SSD driver may assist a student to the door. If the winds are severe, it may be necessary to discontinue cart transportation assistance for students. If this happens, SSD will contact students on the schedule to make alternate arrangements and will work with students regarding any missed class time. Please refer to pages 34 through 35 for additional information on high wind condition procedures. Contact the SSD office for full details regarding cart transportation assistance.

Drop-off and Pick-up Areas

There are 22 cart pick-up and drop-off areas located throughout the San Bernardino Campus (please refer to the map on page 11 for more details).

1. University Hall (South entrance)
2. Serrano Village (North side)
3. Jack H. Brown Hall (South entrance)
4. Health and Physical Education (South entrance)
5. Pfau Library (Northwest entrance)
6. Physical Science Building (South entrance)
7. Temporary Classrooms (North side)
8. Biological Sciences and Chemical Sciences Buildings (South entrance)
9. Social and Behavioral Sciences Building (North entrance)
10. Visual Arts Building (North entrance)
11. Chaparral Hall (North entrance)
12. Coyote Bookstore (South entrance)
13. Performing Arts Building (East entrance)
14. Front of University by the Flag Poles
15. Arrowhead Village (North entrance of Redwood Building #4)
16. College of Education (South entrance)
17. Student Recreation and Wellness (South entrance)
18. Student Health Center (South entrance)
19. Physical Education Building (North entrance)
20. Coyote Village (North entrance)
21. Coyote Commons (North entrance)
22. Wedge (South entrance)

Roadways and Vehicle-Accessible Areas

All members of the university faculty and staff wishing to utilize a state vehicle, electric cart, or any vehicle for work-related travel, must attend special training and must have a valid state issued driver's license and a valid defensive driver's training card. All individuals should exercise caution when traveling on or near roadways and in any areas accessible by vehicles.

Palm Desert Campus

Monday - Thursday: 6 a.m. to 10 p.m.

Friday, Saturday and Sunday: CLOSED

Information Services Hours of Operation

During the regular academic year, office hours are:

Monday - Thursday: 8 a.m. to 5:30 p.m.

Friday: 7 a.m. to 5:30 p.m.

Saturday: 7 a.m. to 3 p.m.

During the summer, office hours are:

Monday - Thursday: 7 a.m. to 5:30 p.m.

Parking Permits

A vehicle must display a CSUSB parking permit when parked on campus; parking is enforced at all times, 24-hours a day, 7-days a week. The only exception to this regulation is when a vehicle parks in a time-controlled space, such as those spaces posted for 30-minute or 20-minute parking.

Visitor Disabled Parking

Visitors who have been issued a disabled placard by the DMV must display the placard in clear view when parked in a disabled parking space. Visitors with disabilities do not need to display an additional parking permit when parked in disabled spaces, and may obtain a complimentary day pass at either of the information centers located at the University Parkway entrance and the Coyote Drive entrance. CSU employees and students are required to purchase and display their personal parking permit along with their DMV-issued placard when parked in disabled spaces on campus.

Disabled Parking Spaces

Disabled parking spaces are located in every campus parking lot and both parking structures on the San Bernardino Campus. The Palm Desert Campus has disabled parking spaces in Lot A. Refer to page 14 for accessible parking locations at the San Bernardino and the Palm Desert Campuses.

Note: *No vehicle shall be parked in, obstruct, block or otherwise bar access to parking in disabled parking spaces.*

Parking Fee Waiver

The campus parking fee may be waived for students with disabilities who meet the eligibility standards based on financial need. To qualify, students must have a DMV disabled placard/plate and meet the federal guidelines for financial aid. Students must fill out and submit the 'Request for Waiver of Campus Parking Fee' form at the Financial Aid Office.

- Lot A – Southside of Health Sciences Building

Emergency Code Blue Phones

Dedicated emergency phones can be found at various outdoor locations throughout campus. These phones are push-button operated and are topped by distinctive blue lights for easy identification. They provide a direct connection to University Police and should be used to report suspicious activity, crimes in progress or any emergency situation. A dispatcher will identify the location of the phone being used (even if nothing is said by the user) and will dispatch police personnel as necessary.

Emergency phones are also located in all campus elevators. Dialing 9-1-1 on any campus phone will also connect the user directly to University Police.

Emergency Phone Locations*:

San Bernardino Campus

- Parking Lots A (2), F, G, H, N (4)
- Sierra Drive between Lots B and C
- Coyote Drive near Information Center
- University Police Department
- University Parkway near Information Center
- Between Sierra Hall and Visual Arts Building
- Between Social and Behavioral Sciences and Chemical Sciences/Biological Sciences Building

- SBX Bus Station
- Athletic Fields
- College of Education (2)
- Pedestrian Loading Zone by Lot C (west of flag poles)
- Pedestrian Loading Zone by Lot D
- Health and Physical Education Building (lower level by tunnel entrance)
- Coyote Village

Palm Desert Campus

- Parking Lot A (2)
- Parking Lot B
- Mary Stuart Rodgers Gateway Building (in the courtyard)
- Between the Indian Wells Center for Educational Experience and the Indian Wells Theater

**Phones are located at or near these locations. Please see maps on page 17 for the San Bernardino campus and page 18 for the Palm Desert campus for more details. **All phones are wheelchair accessible.*

TTY/ TDD/ Video Phones

San Bernardino Campus:

A TDD phone is located in the lobby on the first floor of University Hall and a TTY phone is located within the SSD office (UH-183); please refer to individual building page 89. One video phone for the hearing impaired is located on the second floor of the Pfau Library and can be found in room 2009; please refer to page 71. For more information on video phones, please contact the SSD office.

Palm Desert Campus:

One video phone for the hearing impaired is located in the Services to Students with Disabilities (SSD) Office in the Mary Stuart Rodgers Gateway, Room 203A. The map for this building can be found on page 102 of this guide.

Disruption Plan Policy

Construction activities performed by campus workers or outside contractors can present challenges to maintaining campus pedestrian and/or vehicular movement. These disruptions can range from short durations to longer periods of time depending on the scope of the work being performed. Such construction-related activities must be planned so as to minimize duration and to maintain the safety and functionality of the campus community.

Disruption Plan

A disruption plan must be prepared in advance of any construction activity and shall be submitted by the architect(s) to Facilities Planning, Design and Construction (FPDC) for review and approval. Where possible, a schedule indicating when and how long the disruption will likely be in effect should also be prepared. The disruption plan should include the following:

- Geographical location using the campus base map;
- Identification of pedestrian paths that will become inaccessible;
- Vehicular paths to be closed and out of service;
- Construction site access required or planned for use by construction-related traffic;
- Extent of construction site boundary;
- Barrier type and location to be in place to ensure safety of campus community and security of the construction activity;
- Provision for notification of the campus community for planned intermittent or isolated periods, where disruption is temporary;
- Designated alternate paths for pedestrians and vehicles during the disruption period;
- Provision for service access, deliveries, and other vendor vehicles to reduce impact to campus operations.

Process

A prepared plan and schedule shall be submitted to FPDC for evaluation a minimum of one month prior to the start of construction activity. Once the plan is approved by FPDC, it will be distributed to SSD, Facilities Services, University Police, Parking Services, Student Affairs and any departments that may be affected for their review and input. Final approval will be issued by FPDC as appropriate.

Implementation

Provision of the approved disruption plan requirements shall be incorporated into the project construction documents and/or contract special conditions prior to bidding. An implementation schedule with initiation date and duration of disruption shall be provided a minimum of one calendar week or five working days to allow for notification of the following groups:

- All students
- Faculty and staff
- Service providers and vendors
- University Police Department

Notification Methods

The implementation schedule will be provided for posting or distribution via the following methods:

- FPDC website (<http://www.csusb.edu/facilities-planning-management/campus-disruptions>)
- SSD office
- Email channels (Campus listserv, etc.)

Reporting Physical Barriers to Accessibility

Architectural or other physical barriers to accessibility that are identified on campus should be reported to the campus Facilities Management Department. This can be accomplished by:

- Submitting an online work request via the Facilities Management iService Desk online work order system at <http://facilities.csusb.edu>. This service is available 24 hours a day, and users will receive an automated work request number as a courtesy response;
- Calling the Facilities Management Support Center at (909) 537-5175 (extension 75175 if dialing from a campus phone);
- Advising the SSD office.

Emergency Notification System

CSUSB has implemented the Connect-ED® service to allow university administration and the University Police Department the ability to reach all students and staff with time-sensitive information during unforeseen events or emergencies using voice, email and text messaging. During critical situations, CSUSB officials can use the system to broadcast pertinent information and provide details on appropriate response. This information will not be shared with other entities and it will be kept private and confidential. This is used only for CSUSB communication purposes.

There is no charge to subscribe to the service, but call and text messaging fees from cellular phone service providers could apply. Please provide your most current contact information by logging into MyCoyote and add any pertinent phone numbers through the self-service pages. If the information that is already listed is incorrect, please update the information.

Connect-ED Frequently Asked Questions

What is the CSUSB Emergency Notification System? It is an emergency messaging system that can simultaneously send safety alerts to phones, email addresses, text/SMS and TTY/TDD devices. It will be used only for emergency communication purposes and for occasional announcements that could be of interest to all or specific parts of the campus community.

Where did you get my contact information? The emergency notification system uses contact information from your MyCoyote account. Updates can be made by visiting MyCoyote (at <http://mycoyote.cms.csusb.edu/>) and accessing the self-service pages.

Am I automatically enrolled to receive messages from the Emergency Notification System? While all faculty, staff and students are automatically enrolled to receive emergency messages, we ask that you log into MyCoyote to confirm your contact information. Please provide all of your current information, including a cell phone, so the university will have more ways to reach you in the event of an emergency. Emergency notification alerts will primarily be used for emergency communication purposes.

What contact data should I provide to CSUSB? The alert@csusb service will deliver a pre-recorded message to the following phone types extracted from MyCoyote: main phone number, home phone number, business phone number, cellular phone number and TDD/TTY device

phone number. Campus email addresses will be used for email messages and cellular phone numbers will be used for text messages. The best emergency contact number is probably your cell phone.

How many phone numbers can I put in the Emergency Notification System? Every faculty, staff and student can list phone numbers in the following fields: a main phone, a cell phone, home phone, business phone and TDD/TTY device. A main number is required and can be any primary phone such as your home or cell. Providing your cell phone is recommended so you can receive safety alerts through a text message and a voice message.

LiveSafe

The LiveSafe App provides students, faculty and staff with a direct and discreet connection to the CSUSB University Police Department (UPD) so that campus goers can easily communicate all safety needs. The safety communication platform allows its users to communicate via text, photos, videos and the user's precise location for a range of on-campus issues. The App provides a variety of features, including but not limited to: Safe-walk, maps of campus buildings, bus routes and local community information. It is free and can be downloaded on the Apple App Store or from Google Play. Visit <http://links.livesafemobile.com/CSUSB> and enter your number to receive a link to register for LiveSafe.

Campus Closure Procedures

The university president or designee may authorize a closure of the campus due to a health or safety concern, or due to the interruption or failure of a utility such as electricity or water service. An evacuation may also be declared in the event of a major threat or emergency.

There is a difference between an evacuation and a campus closure. A campus closure occurs when a decision has been made to close the campus because of a specific event, such as high winds or a power outage, which make normal campus operations impossible or unsafe. These are not considered to be immediate emergency situations. An evacuation occurs when it is essential to clear the campus as quickly as possible as in the case of a fire or an earthquake.

Campus communication systems, to the extent possible, will be used to notify the campus community and provide specific information.

Notifications will go out via email, text message (if available), public address system, campus phones, and may also be obtained:

- On the marquee located at the University Parkway entrance to the San Bernardino Campus;
- On the marquee located along the Cook Street entrance to the Palm Desert Campus;
- On the CSUSB website home page at www.csusb.edu;
- By calling the Recorded Emergency Information Hotline at (909) 537-5999; and
- By calling the CSUSB San Bernardino Campus phone number at (909) 537-5000 or the Palm Desert Campus number at (909) 537-8100.

Should a campus closure be ordered, the administrator in charge may elect to close the campus in the following manner:

1. Unless otherwise noted, classes already in session shall continue until their scheduled conclusion, at which time students will be asked to leave the campus in a safe and orderly manner.
2. Employees will be instructed to remain on campus until after students have exited the campus. Employees will then receive information regarding when they should leave.
3. Students living in campus residence halls may remain in the housing units unless instructed otherwise.

In the event of a campus evacuation, students and employees should follow their normal procedures for exiting campus, such as arranging transportation as they would under normal circumstances, or using local public transportation. If regular transportation modes are unavailable or inaccessible due to conditions, students and employees are asked to contact UPD dispatch, where they will be assisted. Notice will be provided about when the campus will reopen as soon as possible.

Transit Services

San Bernardino:

Transit providers including local Omnitrans buses, Metrolink commuter trains from Los Angeles and Orange counties, and Amtrak trains include stops at or near the CSUSB San Bernardino Campus. For specific route and schedule information, please click on the link below:

- Omnitrans:** <http://www.omnitrans.org>
- Metrolink:** <http://www.metrolinktrains.com>
- Amtrak:** <http://www.amtrak.com>
- SANBAG:** <http://www.sanbag.ca.gov/commuter>
- Access Bus:** <http://www.omnitrans.org/routes/access>

Palm Desert:

Palm Desert transit services with stops at or near the CSUSB Palm Desert Campus are offered by the SunLine Transit Agency. For specific route and schedule information, please click on the link below:

- Sunline Bus:** <https://www.sunline.org/riding-sunline/routes-and-schedules>

Transit between the San Bernardino and Palm Desert Campuses:

The Coyote Cruiser shuttle is a service offered to transport students to and from the Palm Desert and San Bernardino campuses. This service is offered during the fall, winter and spring quarters and excludes campus holidays. Please click on the link for more information <https://www.csusb.edu/parking/transportation/campus-shuttle>.

Loading Zones

Designated loading/drop-off zones are located throughout campus and can be distinguished by signage and/or curb markings. All passenger loading/drop-off zones are wheelchair accessible and feature truncated domes for the visually impaired. Vehicles dropping off or picking up passengers need not display a parking permit, but are restricted to a 5-minute time limit, unless otherwise noted. Passenger/drop-off zones are located near the following buildings:

San Bernardino Campus:

- College of Education
- Meeting Center/University Hall
- Murillo Family Observatory
- Student Recreation and Wellness Center
- University Parkway, directly in front of the flag poles
- Yasuda Center

Palm Desert Campus:

- North end of Parking Lot A
- Southside of Indian Wells Theater

Bicycle Racks

Bicycles should only be locked at bicycle racks that are located throughout both the San Bernardino and Palm Desert Campuses. Bicycles may not be locked to or left at railings, hand rails, light poles, landscape or any other object or feature on campus. Bicycles not secured at bicycle racks may be impounded by University Police and Public Safety. The campus also has multiple bicycle rack locations; please see the map on page 16 for the San Bernardino Campus and page 17 for the Palm Desert Campus. For additional information on bicycle policies and regulations, please visit: <http://policies.csusb.edu/bicycle.htm>.

**Individuals with visual or mobility impairments should always exercise caution around bicycle rack areas.*

Bike Share at San Bernardino Campus

The San Bernardino Campus has partnered with Zagster, a bicycle share program that is available for use on the San Bernardino Campus. The bicycle share program utilizes an App and has different levels of membership options. There are three Bike Share stations located at the Student Health Center, the Student Recreation and Wellness

Center (SRWC) and the Social and Behavioral Sciences building. For additional information on the Bike Share program, please visit: <http://bike.zagster.com/csusb/>.

Access to and from Campus

Access to San Bernardino Campus from Interstate 215 at University Parkway

Exit the freeway and travel one mile north/northeast to the end of University Parkway, which becomes the main entrance to CSUSB (at Northpark Boulevard). Ahead and to your left will be the Parking Services Information Booth.

Access to San Bernardino Campus from Nearby Metro Areas & Freeways

Ontario International Airport: Take I-10 east to I-215 north. Exit at University Parkway in San Bernardino and turn right.

Los Angeles International Airport: Take I-405 north to I-10 east to I-215 north. Exit at University Parkway in San Bernardino and turn right.

Pasadena: Take I-210 east to I-215 north. Exit at University Parkway in San Bernardino and turn right.

Orange County: Take Highway 91 east, which becomes I-215 north in Riverside. Continue on I-215, exit at University Parkway in San Bernardino and turn right.

Riverside: Take Highway 91 east, which becomes I-215 north in Riverside. Continue on I-215, exit at University Parkway in San Bernardino and turn right.

High Desert areas: Take I-15 south to I-215 south. Exit at University Parkway in San Bernardino and turn left.

Palm Springs area: Take I-10 west to I-215 north. Exit at University Parkway in San Bernardino and turn right.

San Diego area: Take I-15 north to I-215 north. Exit at University Parkway in San Bernardino and turn right.

Access from San Bernardino Campus to I-215

University Parkway Entrance: Exit via University Parkway and travel one mile south towards Varsity Avenue. Once past Varsity, the northbound entrance will be on the righthand side. The southbound entrance will be to the left just past the overpass bridge.

Palm Avenue Entrance: Access to the I-215 can also be found on Palm Avenue. Exit via University Parkway and head south towards Kendall Drive and turn right. Go about 3.3 miles until you reach Palm Avenue. Turn left and the northbound entrance is on the righthand side. The southbound entrance is to the left just under the overpass bridge.

Access to Palm Desert Campus from Nearby Metro Areas

Indio: Take the I-10 freeway west toward Los Angeles. Take the Cook Street exit. Turn left on Cook Street. Go south on Cook Street past Gerald Ford Drive. Turn left on Berger Drive West.

San Bernardino: Take the I-10 freeway east toward Indio. Take the Cook Street exit. Turn right on Cook Street. Go south on Cook Street past Gerald Ford Drive. Turn left on Berger Drive West. Turn right on Berger Drive West and you will arrive at the University.

Access from Palm Desert Campus to I-10

Cook Street Entrance: Exit via Berger Drive West and travel 500 feet to Cook Street. Turn right onto Cook Street. In about a half a mile the I-10 eastbound entrance will be on the righthand side. The westbound entrance requires you to take a slight right, as you drive over the overpass bridge.

Emergency Evacuation Policies and Procedures

CSUSB has established an emergency evacuation policy to provide information and guidelines to all members of the university community regarding safe and orderly evacuation of buildings in the event of an emergency. We are committed to providing a safe environment for CSUSB students, staff, faculty and visitors. Your assistance in the full exercise of this policy could help save your life or someone else's. This policy was developed based upon the experience of this and other institutions, fire departments and other resources.

Policy Statement

CSUSB, in accordance with California law, requires all persons to leave any facility where an emergency evacuation alarm is activated as promptly as possible via the nearest available exit. If an alarm has not been activated, but it becomes clear that an emergency exists, all persons must leave immediately. Alarm pull stations should be activated upon exit.

No one is expected to endanger themselves in order to effect or assist with the evacuation of others, but everyone has a duty to ensure that other occupants are aware of an emergency. Similarly, it is expected that individuals will, to the best of their ability, aid anyone requiring assistance to evacuate safely.

Emergency Evacuation

CSUSB has adopted a system of evacuation management that will be specifically designed for each building. Each building will have an Emergency Action Plan (EAP). Individuals who function as building or floor marshals, during an evacuation, will use the EAP as a reference tool, to systematically scan their areas to ensure everyone has evacuated and reported to the next level

marshal. The responsibilities of these marshals are explained in the Campus Emergency Management Plan <http://riskmanagement.csusb.edu/emergencymanagement/>. The emergency evacuation alarm systems in most university facilities include visual and/or audible signaling devices, which should alert sensory impaired persons to alarm conditions. If, while evacuating, you notice someone not responding to the alarm, please be sure they are aware of the emergency.

*Areas of Refuge have been identified (typically near emergency egress stairways) within each CSUSB building requiring an Area of Refuge. These areas can be reached by wheelchair users on their own. Once there, they can await assistance from rescue personnel in a position which does not impede or prevent emergency egress by other occupants.

Buildings with Areas of Refuge (San Bernardino Campus):

- Biological Sciences Building
- Faculty Office Building
- Jack H. Brown Hall
- University Hall

See the individual building pages beginning on page 40 for exact locations.

Buildings with Areas of Refuge (Palm Desert Campus):

The Palm Desert Campus buildings do not require Areas of Refuge.

Emergency Evacuation Signs

Signs should be posted by each elevator, with a floor plan indicating the location of exit stairways and the location of the closest Area of Refuge, if any. For additional information and to find out who is the designated floor marshal for a particular location, please contact the Office of Emergency Management at (909) 537-7477.

Evacuation Policy for Individuals with Disabilities

Students/employees with disabilities, building marshals, floor marshals and emergency workers shall familiarize themselves with these procedures in advance of an emergency situation so that they will be prepared to perform evacuation procedures during an emergency. Other individuals with disabilities who may be visiting are encouraged to familiarize themselves with campus evacuation procedures and will be assisted to the extent possible.

The following general guidelines apply to all emergencies and should be followed by the university designated evacuation team as soon as an evacuation has been ordered:

- Consult with any individual who may have difficulty exiting a building. Determine if the individual has a buddy system in place. Ask the individual if s/he will be able to exit the building without assistance (e.g., a wheelchair user in a classroom on an upper floor of a building) and if not, how to best assist BEFORE making a rescue attempt. Also ask the individual if any mobility aids/medical equipment/medications/personal care items

should be removed from the building as well. For example, an individual's wheelchair should be removed with the student, when possible, as it will be needed for the individual's immediate use upon exit from the building.

- A wheelchair evacuation should be attempted **ONLY** by those who have had rescue training. Evacuation should not be attempted by a single individual unless necessary as a last resort.
- Call 9-1-1 if the situation is life threatening.
- Do **NOT** use elevators unless authorized to do so by police or fire personnel. Elevators could fail during a fire, earthquake or flood.
- All multiple story buildings are equipped with emergency evacuation chairs. Please refer to page 36 for a list of evacuation chair locations.

Direct Emergency Response by Disability

Visual Impairment

- Review the nature of the emergency with the individual and inquire as to the best manner in which to assist. In most cases, blind individuals will appreciate others offering their elbow (this is the preferred method when acting as a "Sighted Guide"). Do **NOT** grasp a visually impaired person's arm unless asked to do so.
- As individuals are walking, offer verbal information about location, the route you are following, and the presence of any obstacles (e.g., stairs, overhanging objects, uneven pavement, curbs, and narrow passageways). Use compass or clock directions and estimated distances as much as possible.
- Upon arrival at the designated Emergency Assembly Point, orient the individual as to location on campus and offer further assistance as needed.
- Some visually impaired individuals may have guide dogs that can become disoriented or injured during an emergency. Attempt to evaluate the dog's needs and offer assistance if possible.
- White canes and other mobility aids should be moved with the individual, if possible.

Deafness or Hearing Loss

- Individuals with impaired hearing may or may not be able to hear the audible emergency alarms, depending on the level of hearing loss. Most university buildings are equipped

with visual (flashing light) evacuation alarms. An individual with a hearing impairment may not perceive that an emergency exists. An alternative warning technique may be required. One such alternative involves gaining attention by turning the lights on and off and using hand gestures or a written note to describe the emergency and the evacuation route, e.g., “Fire – go out the rear door to parking lot.”

- Ongoing visual instructions may be needed along the evacuation route. It may be necessary to point in the direction of the exit or use an evacuation map in order to advise individuals with impaired hearing of the safest evacuation routes.
- It is important to note that individuals with hearing impairments sometimes have voice/speech impairments as well. They may be carrying or using a whistle or have some other means of attracting the attention of others.

Mobility Impairments

- Most individuals with mobility impairments will be able to safely exit a one-story building without assistance. Individuals who have difficulty opening doors or encounter obstructed pathways should ask their buddy or other individual(s) around them for assistance or call 9-1-1 from a telephone for assistance. Individuals on or above the second floor or in the basement of a building may require varying levels of evacuation assistance.
- If an individual with a mobility impairment is unable to exit a building safely, an attempt should first be made to help direct him/her to the Area of Refuge to await assistance from emergency personnel. If there is no Area of Refuge, or the area is obstructed, the individual should be directed to a safe area to await assistance from emergency personnel. A safe area might include the end of the building near an exit opposite the emergency hazard, an enclosed stairwell or a classroom with a closed door. It may be necessary, if possible, to clear the individual’s path.
- In general, individuals with mobility impairments should not be evacuated by untrained personnel. However, if an individual is in immediate danger and cannot be moved to a safer area to wait for assistance, the situation may become urgent, making it necessary to evacuate using a carrying option or an evacuation chair. Carrying options include using a two-person lock-arm position or using a sturdy chair, preferably a chair with arms. Every

attempt should be made to properly secure the individual in the chair. Using a seatbelt or belt can be useful, if available. Before making this type of rescue attempt, always ask the individual about the preferred method of assistance. This is essential because moving and lifting individuals with certain types of disabilities can result in serious injury to the individual.

Always consult the individual as to preference with regard to:

1. Actual method of removal from wheelchair.
2. Number of persons generally required for safe removal from the wheelchair.
3. The advisability of lifting/moving extremities due to the potential for pain or spasticity due to the presence of braces, catheter leg bags, etc.
4. The need to bring along (and possibly detach) mobility aids/medical equipment/medications/personal care items (i.e., an oxygen tank, catheter bag or rescue inhaler).
5. The need for a seat cushion or pad to be brought along after the individual has been removed from the wheelchair.
6. The advisability of being carried downstairs in a forward or backward position.
7. The need for after care. For example, some individuals may require medical treatment after being removed from their wheelchairs.
8. The wheelchair should be evacuated along with the individual, when possible, and should be made available to the individual as soon as possible after evacuation. A wheelchair is essential to a wheelchair user's ongoing safety and mobility.

Note: *The evacuation chairs utilized by the university are intended to help the mobility impaired quickly descend the stairwells in the event of an emergency.*

- Individuals who are evacuated will be taken to the designated evacuation site (please refer to page 34 for the San Bernardino Campus and page 35 for the Palm Desert Campus) and will be connected with emergency personnel. Accommodations will be made on site as possible and appropriate.
- Some individuals with mobility impairments may also be prone to respiratory complications and will be particularly vulnerable in an emergency involving smoke or fumes. This should be considered during evacuation and shared with emergency personnel.

Police and fire personnel should be immediately notified of any individuals remaining in a building as well as their locations. Emergency personnel will evaluate whether the individual is safe in that location or whether an evacuation is necessary.

Power Outages

- If an outage occurs during the day and an individual with a disability chooses to wait in the building while electricity is being restored, it may be helpful to move near a window where there is natural light and access to a telephone. Individuals with disabilities are advised to call the UPD at (909) 537-5165 to obtain status information about the outage. During regular building hours, building marshals should be notified so they can advise emergency personnel.
- If an individual with a disability would prefer to leave the building and an evacuation has been ordered, or if the outage occurs at night, call the UPD at (909) 537-5165 from a campus telephone to request evacuation assistance.
- As soon as information is available, the campus notification system will provide a recorded message stating when power is likely to be restored.

Injured Person

Injured persons should not be moved unless there is an immediate threat to their lives and then only to the nearest ground level exit/stairway. First aid should be given immediately. Make certain the building marshal/floor marshal knows the location of any disabled or injured persons.

Hazards

In the event of strong winds, fire, earthquakes or floods, all persons on campus should take precautionary measures to protect themselves and their property. In such events the University Police, Facilities Services and Environmental Health and Safety (EHS) will determine appropriate actions and attempt to notify campus personnel as soon as possible. Because of our elevation, please be aware that ice does form on campus walkways. It has also been known to snow at CSUSB.

High Winds

Both CSUSB campuses are located in geographical areas that are often affected by wind conditions because of their proximity to local mountains and passes. The most frequent winds occur from September through March and are typically referred to as Santa Ana winds. These

winds vary in intensity based on the existing meteorological conditions, but often have gusts that are capable of causing injury and/or property damage.

The UPD monitors wind/weather reports whenever such conditions appear to threaten the university community and identifies four stages of sustained wind conditions. The definitions of each condition and appropriate precautions can be found in copies of the Campus Emergency Procedures posters that are in classrooms, offices, and other prominent locations throughout the campus.

During windy conditions, it is often necessary to close, lock, or disable manual and automatically operated building entrance doors throughout campus to prevent personal injury and/or damage to the doors. Students, faculty, staff and visitors should be aware of this fact and be prepared to enter buildings via other entrances during wind conditions. The Campus Accessibility Guide highlights accessible entrances for each building and should serve as a reference to determine alternate accessible entrances during such periods when doors/entrances are closed. The guide can also be accessed online at: <https://www.csusb.edu/emergency-management>.

To Mitigate the Disruptive Effect of Door Closures:

- Doors will not be closed or disabled without consideration of the accessibility-related impact of each closure.
- Signs will be posted on each closed door that indicates it is “CLOSED” because of winds and alternate entrances will be identified.
- Facilities Services Support Center will be immediately notified when campus personnel close any accessible entrance.
- The SSD office will be immediately notified of such closures and an email will be sent to the SSD student listserv.
- All closed doors/entrances will be reopened as soon as practical when the windy conditions have been downgraded or winds diminished.
- The Facilities Services Support Center will immediately notify the SSD office and an email will be sent to the SSD Student listserv when doors/entrances are reopened.

Campus Evacuation Chair Location Report

An evacuation chair is a quick and safe method to evacuate individuals with disabilities such as wheelchair users or individuals who may have been injured, downstairs during an emergency such as an earthquake or a fire when elevators should not be used. The table below shows the locations of evacuation chairs in the various buildings throughout both CSUSB campuses.

About Individual Buildings

The following pages provide detailed information regarding the various buildings and facilities located throughout the CSUSB campuses. They are arranged in alphabetical order by building name, and each features information regarding accessible outdoor paths of travel, entrances, facilities, chair lifts and locations of any required Areas of Refuge in each building. Additional information including the number of floors and elevators in the building, building occupants and the year each building was constructed can also be found on these pages. Pages 41 to 96 are buildings located on the San Bernardino Campus and pages 99 through 102 are buildings located on the Palm Desert Campus.

Note: *For the purpose of this guide, restrooms, drinking fountains and entrances that meet or exceed the minimum requirements as specified by the Americans with Disabilities Act Accessibility Guidelines and Title 24 of the California Code of Regulations are identified as “accessible.” For more information regarding guidelines, measurements, specifications and other design features, please contact FPDC.*

Areas of Refuge

Areas of Refuge are designated areas where people who are unable to use stairs may remain temporarily in safety to await further instruction or assistance during an emergency evacuation. These areas are identified in the individual building pages.

Campus Courtesy Phones

Campus courtesy phones are located in most classrooms, offices and hallways. These are available for making free calls to on-campus offices. Dialing 9-1-1 on any campus courtesy phone will connect the user directly to University Police. The sheer number of phones located throughout campus make it nearly impossible to indicate every individual phone in this guide. For information regarding courtesy phone locations in specific buildings, please contact the Telecommunications and Network Services office.

High Winds: North-Facing Doors

Both CSUSB Campuses are located in areas often affected by Santa Ana wind conditions. During high winds, custodial staff may exercise their discretion in closing north-facing doors. All individuals should exercise extreme caution in these conditions and should proceed to the nearest accessible entrance. More information regarding wind closures can be found on page 32.
