MASTERS PROJECT PROPOSAL PRESENTATION

Date/Time

June 13, 2019 (Thursday), 11:00 AM

Location

JB 389/391

Topic

Movie Success prediction using Data Mining

Candidate

Devalkumar Patel

Advisor

Dr. Ernesto Gomez

Committee Members

Dr. Qingquan Sun

Dr. Yan Zhang

Abstract

This project is for helping the youth and movie fan who is in confusion about movie before release date using cutting edge technology called Data Mining which is very popular right now. In this project, there will be use many maths fundamentals and algorithm concepts for prediction and analysis of data. Intense practice for data collection and partitioned them in different format in which is needed for analysis. So, it is a good learning opportunity in a very different and fresh new sector for whoever is interested.
