JOB MARKET FOR ENVIRONMENTAL HEALTH SCIENCE GRADUATES

CSUSB Environmental Health Science Major

The EHS Program at CSU San Bernardino is a great path for students who want to get a **well-paid and secure job** right after graduation. By joining the EHS program, you have many choices to work for the County, State, Federal government, and the private sector as a Registered Environmental Health Specialist (REHS), industrial hygienist, hazardous waste control expert, air and water quality manager, and vector control specialist. It opens a door on you to take a **variety of positions** from food inspector to land use expert and from milk and dairy quality controller to housing and institutional health inspector. For those who plan to become REHS, **this program provides the shortest path** to the registration process, supervised by the California Department of Public Health (CDPH). Our program is not only accredited by the CDPH but by the National Environmental Health Science and Protection Accreditation Council (EHAC), making our graduates eligible for job opportunities as environmental health officers in the military and the Commissioned Corps of the US Public Service. This program provides an excellent opportunity for not just working in an office, but also visiting various field sites, meeting with people and **gain valuable experience** about your local community, state, and the nation.
