# INNOVATIVE LECTURE VIDEOS

Results from Oct 23, 2020

Tips and Tricks!

- Consider having **short videos** of you (not just audio) for your students.
  - Helps build a sense of belonging, community, increases interaction, and students **invest more in learning when they feel a sense of community!**

- Avoid adding a date to your videos.
  - This will help you **repurpose** them for another semester/course.

- **Limit** the video software you use to **no more than 3 types.**
  - Helps avoid burn out, fatigue, and being overwhelmed for students and instructors.

- **Free!**
  - First go for free tools or those with institutional licenses!

- **The big 3s**
  Approach video lectures in 3 parts:
  - **Attention grabbers**
    - Ice breakers, Q&A, share a fun story, etc.
    - Use the chat box to quickly share a pic/video/meme relevant to the topic to grab attention.
  - **Content**
    - Focus on content of the lecture and topics.
  - **Attention keeper**
    - Apply to real world or something relevant to student life to keep students' attention on the topic.

- **Excitement!**
  - Show excitement!! Students will likely reflect the same level back!

EFFECTIVE AND BEST-PRACTICE TOOLS

- Flipgrid
- XSplit
- Adobe Spark
- Go React
- Voice Thread
- PlayPosit
- Camtasia
- Bandicam and Bandicut
- Lightboard
- Jamboard
- Snagit

For more information and help on how to integrate these in your classroom, contact us at: trc@csusb.edu

Feedback of Pedagogy Cafe!

These Pedagogy Cafes are an awesome idea!
I am very impressed and inspired!
This makes our students excited to come to class online!
Very enjoyable!
WOW!
Amazing!!
Amazing technology!
Great session!!
Great to attend the café!

Pedagogy Cafe:
Fridays, 9-10AM
Oct 9-Dec 4, 2020
