

# FIELD

## FIELD Summer Internship at the NASA Jet Propulsion Laboratory - 2020

The University of California, Riverside and NASA's Jet Propulsion Laboratory (JPL) have developed the FIELD program to train the next generation of scientists and engineers in large-scale data analysis and visualization. This opportunity is available for undergraduates with majors in STEM fields from all UC campuses, California State Universities, community colleges, and regional universities. Underrepresented minorities are especially encouraged to apply.

Selected students will conduct research during a 10-week summer internship at JPL in Pasadena, CA. The interns will be working under a JPL science staff member on projects related to data science, analysis, and processing.

Opportunities for guided tours at JPL will also be available for intern candidates throughout winter and spring quarters.

### REQUIREMENTS

- GPA 3.0 or above (3.5 preferred);
- Preferably enrolled in the 2<sup>nd</sup> or 3<sup>rd</sup> year of undergraduate studies;
- Be a US citizen.

### INTERNSHIP AWARD

- This internship has a financial package totaling \$8,300
