

Job Description for LRI GA

Professor Hideya Koshino is seeking a motivated graduate student to participate in exciting research in the *Learning Research Institute. The (LRI)* promotes an interdisciplinary scholarly focus on the student learning experience and how it may be improved. The Institute supports this focus by sponsoring and conducting research activities that examine the cognitive, neurobiological, and environmental variables that contribute to the academic success of our diverse student body.

The Job is a part-time position (10hr/week for a semester time appointment, \$16/hr.)

No office hour needed but should be available during normal working hours by email or phone. Job responsibilities include but not limited to write computer programs for experiments, collect data, and analyze data.

The ideal candidate will have the following qualifications:

Strong writing skills

Strong working knowledge in Experimental psychology, such as experimental designs and data analysis.

Strong analytical skills

Excellent academic record
