Special Status Report

64% Surge in Violent Attacks Propel Los Angeles Hate Crimes to Multi-Year High With 15% Overall Increase

Written by Brian Levin, Director & Analytic Charting by Kevin Grisham, Assistant Director of Research, Center for the Study of Hate and Extremism

Executive Summary

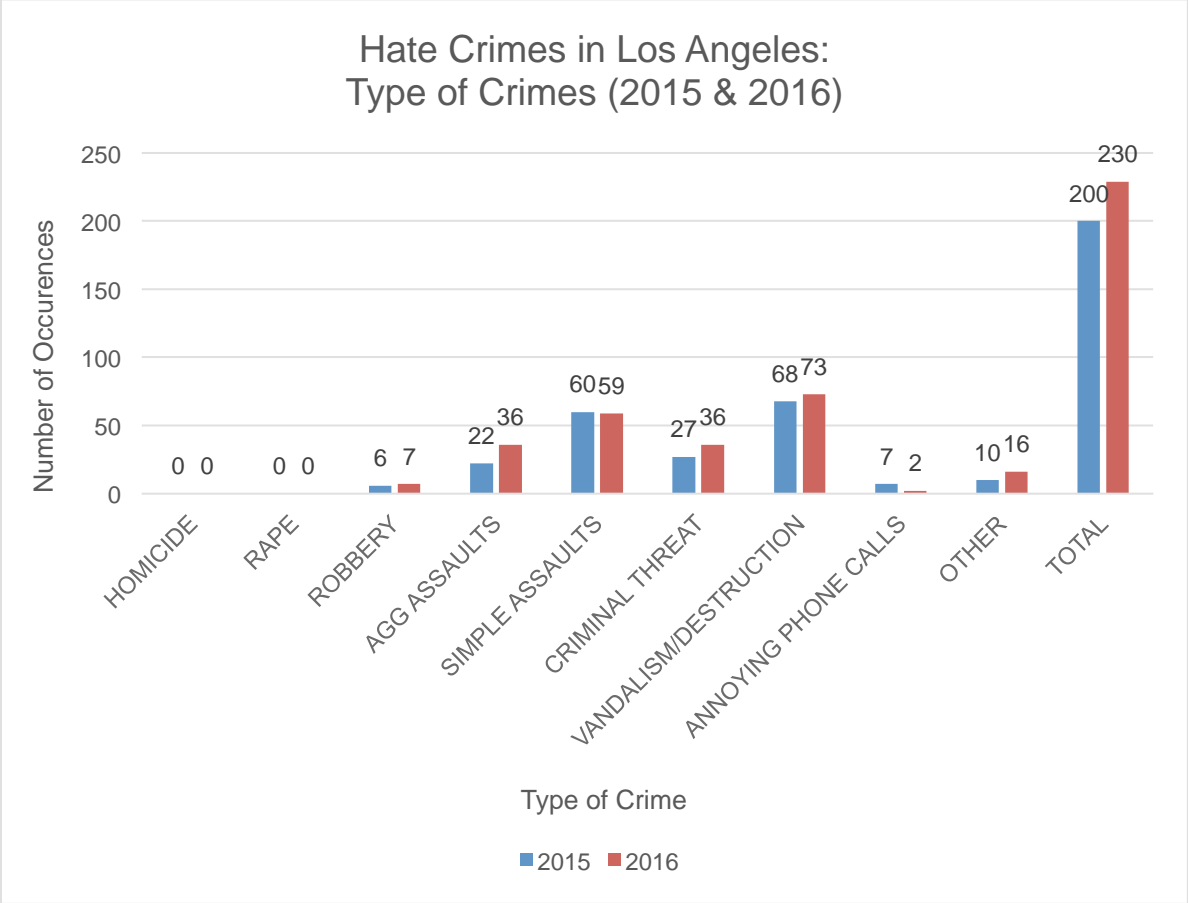

Hate crimes in the city of Los Angeles hit multi-year highs in 2016 with an overall increase of 15%, according to an analysis of official LAPD data by the Center for the Study of Hate and Extremism at California State University, San Bernardino. Last year's increase to 230 hate crimes from 200 in 2015, was driven in large part by a 64% surge in violent aggravated assaults, an 18.5% rise in racially motivated crimes and a 24.5% increase in crimes against the LGBT community. By comparison

aggravated assaults overall in the city in 2016 rose about 10% and robberies rose 13%. Of the localities surveyed Los Angeles had the third largest number of hate crimes in the nation, with only New York, with 380 and Boston, with 275 reporting more. Religious hate crimes against Jews and Muslims declined significantly in the city during the period. There were no bias homicides reported by the LAPD in the last two years.

The 36 reported aggravated assaults include those physical attacks with a weapon or those capable of producing serious bodily injury. Hate crimes are those criminal acts motivated in significant part by the actual or perceived group characteristic of another such as race, religion and sexual orientation.

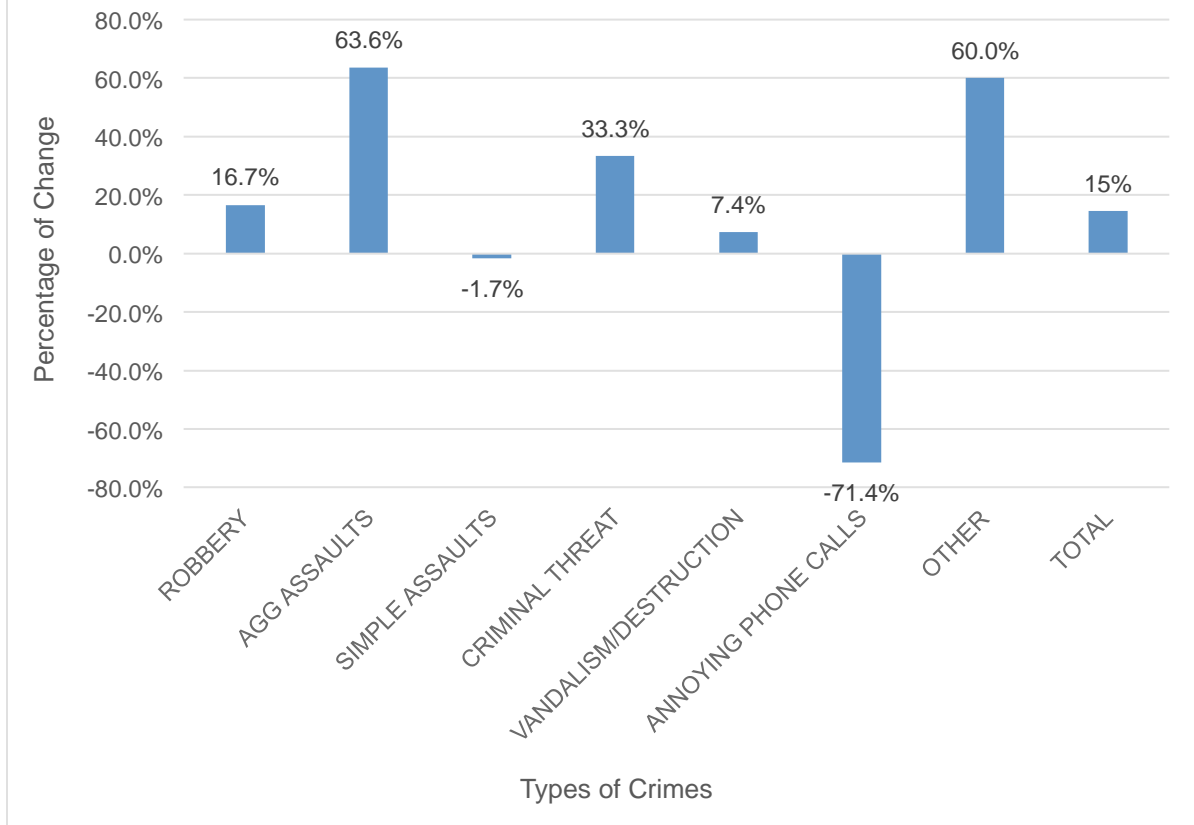

For Los Angeles the 2016 totals were the greatest number of hate crimes since 2008 when the city recorded 280 hate crimes. While 2016 is also the third annual consecutive increase, last year's totals are still far below various highs tallied in recent decades. In 2001, the year of the 9/11 attacks, Los Angeles had 559 hate crimes, the highest number so far this century. In 1992 official data did not accurately include the over 60 people killed and others injured in rioting following the state trial acquittal of the officers involved in the videotaped Rodney King police beating.

Overall percentage increases in hate crime in Los Angeles, the nation's second largest city, for 2016 were above the 10% average rise seen in 16 of the most populated localities, but less than those found in New York and Chicago, the first and third largest cities. In total hate crimes rose 13.3% last year in all the jurisdictions surveyed nationwide, with a 10% overall increase in large cities and counties. Ten of 16 large cities and counties nationally reported increases, with eight at multi-year highs. Crime overall was also up in 2016 in Los Angeles (through Dec. 17), with violent crime up 10% and property crimes rising 4%.

Data collected by Brian Levin, Director of Center for the Study of Hate and Extremism; Charting Analytics by Kevin E. Grisham, Assistant Director of Research, Center for the Study of Hate and Extremism

While Los Angeles had three straight years of rising hate crime, the nation has not seen consecutive increases since 2004. If preliminary national increases, which will fluctuate as more data comes in from other jurisdictions, hold for the rest of the nation, 2016 will be the first time since 2004, when America has had back to back annual increases in hate crime. The FBI recorded total of 7,462 hate crimes for 2004 is significantly higher than the 5850 that was reported nationally in 2015, which was a 6.7% increase from the prior year.

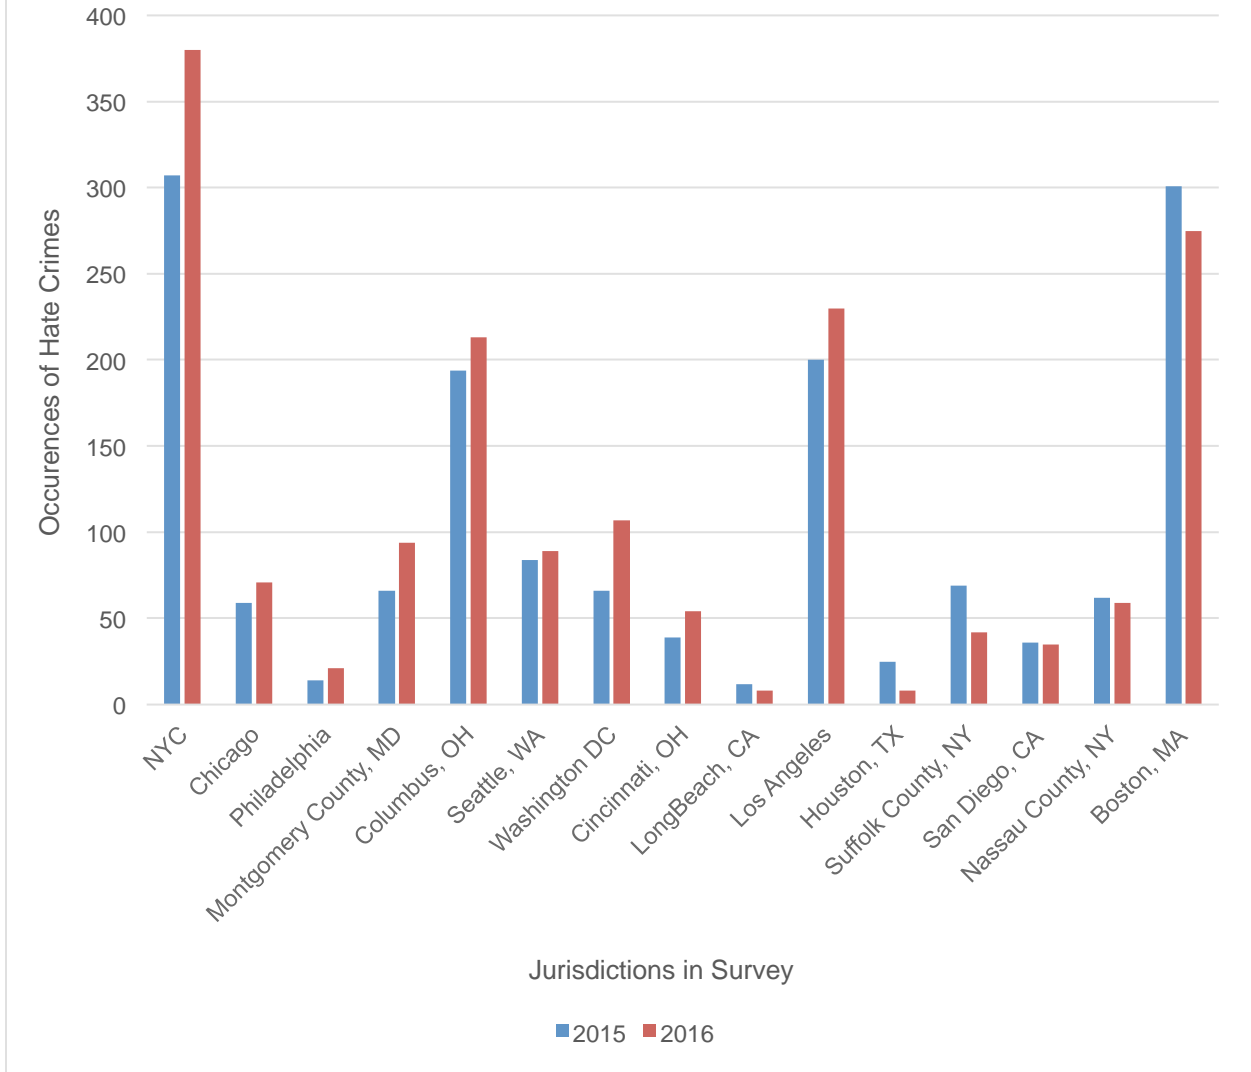

In 2016 our study shows hate crime in Chicago rose 20% in 2016, 24% in New York

City, 50% in Philadelphia, with the largest increase, 62%, in Washington DC. Seattle with an only 6% increase, and Columbus, Ohio, with a 9.8% rise were the only jurisdictions where percentage increases fell below double digits. Boston, Houston, San Diego, Long Island, NY and Long Beach, CA all had declines in 2016. Long Beach, CA, had the smallest number of hate crimes of the agencies surveyed, declining by four incidents or 33% last year, but it has already equaled its 2016 totals in the first two months of 2017.

Some, but not all, agencies that broke data down by month, showed significant increases around election time in November and December 2016. East coast cities like New York City, Philadelphia, Boston and Montgomery County, Maryland were among those jurisdictions experiencing precipitous increases in hate crime during that period in 2016. Similarly, Los Angeles showed a 29% increase in the fourth quarter of 2016, when compared with the previous year. However, mid-west cities including Chicago, Columbus and Cincinnati did not experience significant increases reported during that period. Our study last year found a correlation between political speech by leaders and spikes or declines in hate crimes following terrorist attacks depending on whether the message was tolerant or confrontational.

Los Angeles was not one of the several agencies surveyed with 2017 data. New York City and Long Beach, CA were only other jurisdictions showing a clear 2017 increase, with New York showing a doubling of incidents year to date versus 2016, led by a continuing surge of anti-Semitic attacks.

The author received no financial support for the research, authorship, and/or publication of this report. Any errors or omissions in this study are solely those of the author.

Brian Levin (Author) is a professor of criminal justice at California State University, San Bernardino, where he is the director of the Center for the Study of Hate & Extremism. He has testified before both houses of Congress and various state legislatures on hate and terrorism. He is also the principal author of various United States Supreme Court *amici* briefs on hate crimes. Professor Levin formerly worked for civil rights groups and as a New York City Police Officer. He received his JD from Stanford Law School where he was awarded the Block Civil Liberties Award and his BA summa cum laude from the University of Pennsylvania with multiple honors in American History.

Kevin Grisham (Analytic Charting) is an associate professor of geography and environmental studies and assistant director of research for the Center for the Study of Hate & Extremism at California State University, San Bernardino (CSUSB). He specializes in analysis of terrorism, violent political movements and globalization. He teaches within the Global Studies option of the Department of Geography and Environmental Studies at CSUSB. His most recent book is [Transforming Violent Political Movements: Rebels today, what tomorrow?](#) (Routledge, 2014). He received his PhD and MA in Political Science from the University of California, Riverside and his BA in Criminal Justice from CSUSB.

The author of this report would also like to thank crime reporting agencies in the metropolitan areas and counties contained within this report.
