California State University San Bernardino
School of Computer Science & Engineering
Master's Project Presentation

Date/Time
Friday December 10, 4:30 PM

Location
JBH 356 or https://csusb.zoom.us/j/87963502666

Topic
CS Master's Project, Data Science Application

Candidate
Jensen Gastelum

Advisor
Dr. Ernesto Gomez

Committee Members
Dr. Yan Zhang
Dr. Kerstin Voigt

Abstract
Data Science and Machine Learning go hand and hand. The Data Science process could involve the finding of a mathematical model that makes the best projected accurate prediction possible. Doing machine learning algorithms by hand that accomplish this is very time consuming, as well as applying a new Data Science Methodology process to each individual data analytics question. This all could be simplified when applying software engineering principles that automate a few of these steps, if not all. Automation has been proven useful in many other fields, and Data Science is no exception.
