

Proposal Preparation and Submission

About the Workshop

In addition to covering how ORSP can assist you with your proposal preparation and submission, ORSP will also provide tips for using the SciENcv portal for exporting personnel documents in various agency formats.

NSF is partnering with the NIH (and more recently, Department of Energy) to use SciENcv as an approved format for use in preparation of the biographical sketch and current & pending sections of a proposal. SciENcv will allow users to export NIH, NSF or DOE formatted personnel documents for inclusion with your proposal submission(s). Additional federal agencies *may* start using the system as well.

Come learn how to get started!
