Title

SMSU Maintenance Work Order

Student

Roman Ibba

Advisor

Dr. Qiao

Abstract

Created a web application for the Santos Manuel Student Union. It is a work order form that allows an employee to enter their name, extension and email as well as a job description, location and priority of what is going to be worked on. The user can view all the entries in a table format and delete the entry or edit the entry. When editing the entry the user can add cost, time to fix, comments, status as well as enter the date finished.
