Title

Learning the Essentials of Web Development and Creating a Resource for the
STEM Club

Student

Kevin Gomez

Advisor

Dr. Fadi Muheidat

Abstract

Developing a website for the STEM Club in CSUSB and learning the fundamentals of software engineering, specifically web development. The primary goal of this project is to create a functional website that serves as a resource for the STEM club's members and provide information about club events, activities, and opportunities. The website will have several sections, including a home section, a subscriber/membership section, a blog of events, and information about values and objectives.
