LIST OF FIGURES

- FIGURE 1. Additional Info Sheet
- FIGURE 2. Segment of a Survey Instrument
- FIGURE 3. Secondary Data Codebook
- FIGURE 4. Sample Database
- FIGURE 5. Multivariate Modeling shown through a Map
- FIGURE 6. Overlaying Data

- Table 1. Type of Statistic and Graphic to use based on the Level of Measurement
- Table 2. Type of Statistic to Use with Two Levels of Measurement
- Table 3. Measures of Association for Nonparametric Statistics -- Nominal
- Table 4. Measures of Association for Nonparametric Statistics 2 Ordinal Variables
- Table 5. Hypothesis Testing for Discrete Data (Nonparametric Statistics). All Alpha levels follow the .05, .01, or .001 convention
- Table 6. Testing Hypotheses for Continuous Data (Parametric Statistics)
- Table 7. Sample Characteristics for the Victimization Study, 2000.
- Table 8. Comparing the DUI Survey respondents with the Undergraduate Campus Population for the 2000 2001 Academic Year
- Table 9. Mean, Standard Deviation and Range for Self Control, 1996 (N=100).
- Table 10. OLS Regression Analysis of Homicide Rates (1999-2001).
- Table 11. t-Test Results for Difference of Means in Factors of Social Control (N=604).
- Table 12. Frequencies, Coding, and Factor and Reliability
- Table 13. Logistic Regression Coefficients Predicting Early Onset by Level of SES.
- Table 14. Bivariate Correlations Matrix for Independent Variables and Composite Dependent Variables (N = 428).
