

Dear Faculty, Staff, and Student Assistants:

In compliance with the South Coast Air Quality Management District (SCAQMD) regulations, the University is required to have all state employees complete a brief survey to track progress in reducing single-occupant vehicle trips to campus. This survey asks how you arrived to campus during the survey week of October 19th - October 23th and it should take less than one minute to complete. Unpredictably, this survey is being conducted during the current COVID-19 pandemic and many campus employees are working from home. While many employees typical commute mode to campus may be driving, **telecommuting** is one of the options on the survey. Employees should make this selection for each day they worked from home during the survey week.

Please click on the link below and complete your survey today. **Our goal is to achieve a 100% response rate.** If you have any questions, please contact Parking and Transportation Services at 909.537.5912 or email rideshare@csusb.edu

<https://www.ridelinks.com/csusb/>

Thank you for completing the survey.

Regards,

Tomás D. Morales
