Post-Graduate Certificate Program in
National Cybersecurity Studies

California State University, San Bernardino (CSUSB), ranked among the top universities for innovation and student diversity, is excited to offer its Post-Graduate Certificate (PGC) Program in National Cybersecurity Studies (NCS).

This program equips students with the foundational skills necessary to critically analyze complex issues in national and global cybersecurity, and effectively respond to the sophisticated cyber threats facing today's organizations. Whether you're new in the industry or an advanced professional, the PGC is your pathway to success and a potential fast-track to CSUSB's MS in National Cybersecurity Studies.

Fast and Flexible
Complete four 3-unit courses in just two semesters, designed for convenience and to fit your busy schedule.

Enhance your Professional Standing
Coursework prepares students to pursue further graduate study or to develop and apply professional skills.

Pathway to MSNCSS*
PGC Program in NCS can be used as a pathway toward the Master of Science in National Cybersecurity Studies.

Optional Practical Training (OPT)
PGC students can use the federal Optional Practical Training (OPT) program to work for one year in the USA without any visa sponsorship.

*The PGC Program in National Cybersecurity Studies can be used as a pathway toward CSUSB's MS in National Cybersecurity Studies program. Students who successfully complete their PGC program can apply their twelve (12) PGC credits to the MS in National Cybersecurity Studies program. However, PGC graduates *are not automatically admitted to MS in the National Cybersecurity Studies program*; they must apply separately to the program and meet its academic and other requirements
