Interpreting Your Report

The display below highlights details in the *Respondent Profile* that are important to keep in mind when interpreting your results. For more information about the sampling technique, weighting, and the survey properties, please visit our Web site (nsse.iub.edu) or contact your NSSE Project Services team.

1. The *Respondent Profile* is based on information from all randomly selected or census-administered students for both your institution and your comparison institutions. Targeted and locally administered oversamples and other non-randomly selected students are not included.

2. **Class:** As reported by your institution.

3. **Item numbers:** Item numbering corresponds to the survey facsimile included in your *Institutional Report* and available on the NSSE Web site.

4. **Item wording and variable names:** Survey items are in the same order and wording as they appear on the instrument. Variable names are included for easy reference to your data file and codebook.

5. **Response options:** Response options are listed as they appear on the instrument.

6. **Count and column percentage (%):** The Count column contains the number of students who selected the corresponding response option. The column percentage is the weighted percentage of students selecting the corresponding response option.

Counts are unweighted and cannot be used to replicate column percentages. Column percentages are weighted by gender and enrollment status. Comparison group percentages are also weighted by institutional size. For more details on weighting visit: nsse.iub.edu/html/weighting.cfm
