CLASS Meeting Minutes

Thursday November 21, 2019
12:00-1:30pm; CE-242

I. Discussion Items
   a. The role of CLASS in influencing and supporting a culture of continuous improvement; The role of CLASS in professional development on campus
      Review CLASS Charge 2016
         i. CLASS migrating from Academic to Institutional.
         ii. Faculty Perception has come a long way. What is it that you are doing for the program. Everyone has done something legitimate with Assessment and has proven to be helpful. Shouldn’t rely on WSCUC for reviews.
   b. Choose a landscape that represents your understanding of the current state of assessment and continuous improvement (1) for yourself and (2) for the unit you serve. Be prepared to discuss how that landscape represents your understanding.
      i. What the institution is really doing with assessment information. Fear of the check-box limitation.
      ii. Rocks are the institute. Fog is learning and what people have done.
      iii. Why do universities exist? We are teaching people new things. How do we know they are learning? Have to assess. There is a huge disconnect, lack of accountability lack of support, constant change of administration. What is your accreditation team telling you? Look at what other institutes accreditations are doing, template of their assessment plan.
      iv. Had conversations that programs are based on Student Outcomes.
      v. Clockwork: in the picture: Everyone on their pace. Chaos of the day, restraints, visits from WSCUC, managing is occurring, recreating the wheel. Activities always change, administration is changing and program coordinators are changing as well.
      vi. Accept it, understand it, but feel it’s a lonely giraffe, hard to motivate people. Faculty generally accepting, some don’t like the way it’s done, but move on. Always a certain group. Some want to do it better.
      vii. Seasonal sometimes its calm, turbulent and progress is made. It does count. Proud of the progress.
   c. What are the barriers: awareness, willingness, ability???
      i. Need to bring awareness of assessment.
      ii. Perception that assessment is associated with administration; can be looked at as “us vs them”. Not just awareness, but actually doing it; identify it.
      iii. Miscommunication. Give stakeholders the whole picture of the process. The reputation of the program takes a lot of effort.
d. Needs assessment on the SRS: srs.campuslabs.com; connect ID 26483
