# UNIVERSITY POLICE AND EMERGENCY MANAGEMENT ASSESSMENT PLAN

CSUSB WE DEFINE THE *Future*

# University Police and Emergency Management

## ■ Assessment Purpose

- What supplies do we have on campus for emergency response?
- What supply levels should we have on hand for the potential events that may impact the campus?
- What are the industry standards regarding inventory management and how do we apply these where appropriate?

# University Police and Emergency Management

## ■ Assessment Methodology

- Review and update spreadsheet of current supplies
- Determination of what minimum inventory for a campus our size looks like through contacts with other universities, city partners, etc.
- Storage issues

# University Police and Emergency Management

## ■ Assessment Data

- Spreadsheets
  - Cots, ADA cots, blankets, water, medical supplies, PPE, water
- Outreach to other campuses
  - Who has what and is it a standard inventory
- Risk Assessment
  - What should we be planning for

# University Police and Emergency Management

## ■ Assessment Findings

- COVID made inventory difficult to complete
- Other campuses having same issues
- Current inventories are outdated and difficult to access
- While there are minimum inventory levels, there is no industry standard for appropriate disaster supplies, also extremely incident driven
- Storage, rotation, and placement are obstacles
- Supply chain considerations
- What will we really need?

# University Police and Emergency Management

## ■ Implications

- Develop minimum inventory levels
- Storage solutions
- Institute rotation of goods procedure
- Continue to assess risk and update stock
