Available Research Resource!

NOW OPEN:

The Office of Student Research

The Office of Student Research (OSR) promises to be a valuable resource for students and faculty, rich with information, research materials, and links to the campus and community at large. The OSR will promote graduate and undergraduate student research by serving as a clearing house of opportunities. Associate Provost for Research, Dr. Jeffrey Thompson explains, "We've had research support for faculty in the past and now we'll have support for students, as well."

Director, Francisca Beer's office (JB 439) serves as home to the OSR staff, part-time assistant Jessica Lee and intern Sarah Ho.

In addition to establishing a permanent home for the center, the staff has been busy helping to create a web site, develop a center logo and publish an informational handout. "There is so

much to think about when creating a new center on campus! We had no idea the complexities that would be involved just to get us up and running," indicates Beer.

Striving for representation across the diverse fields of research across campus,

Beer has worked diligently to find faculty that want to serve as faculty advisors to students. "We have someone representative of each college on campus, who are members of the OSR Advisory Board," Beer

explains.

These faculty members have agreed to give time and effort to this center above and beyond all of the other demands of their jobs, "Because they are as excited as I to see our students engaging in original research projects and activities. We want to help support those endeavors."

Continued, p.2...

...they are excited as I to see our students engaging in original research projects and activities. We want to help support those endeavors!

Francisca Beer, Director OSR / Prof. Accounting & Finance

Scholarship in Action

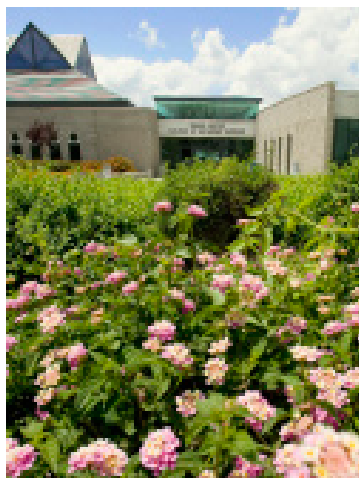

Vol. 6, Jul 2011- June 2012

According to Beer, the OSR was created to facilitate the engagement of students in scholarly activity related to their disciplines by providing resources that support both student scholars and faculty mentors. "In other words, we will supply the information and resources, and we will be here to assist students at any stage in the research process. We want to provide our students with the resources they need in order to carry out research projects and creative activities." As Associate Provost for Research Thompson explains, "Studies have shown that engagement of students in their field of interest through research and creative activities increases their chances of staying in school and graduating. In addition, they learn important skills that will make them successful in graduate programs and in their chosen careers."

Students will find the OSR equipped with resources to assist them in finding research opportunities, filling out applications, and applying for grants. The center will also host seminars and co-sponsor workshops that will provide students with links to internships and community-based research projects.

Additionally, plans for an annual student research symposium hosted by the OSR will offer students a first-hand opportunity to exhibit research and creative activities locally in preparation for attendance and presentations at national and international academic conferences. Beer states, "Research is the foundation of the academic world; pertinent to making advances in any field. Our job is to provide the students with the information about resources for research and creative activities to facilitate student involvement across campus."

The OSR offers students an opportunity to work with faculty members in a student-mentor relationship and to better refine skills with the goal of publication, presentation, performance, or exhibition of the project results or products, which is central to the University's mission of scientific discovery, scholarly activity and artistic creation. Beer states, "Once we assess the students' needs, we can tailor offerings to be most helpful."

Dr. Beer and the OSR staff worked closely with a web development manager here on campus to design and construct a website full of resources.

Beer states, "Michael Casadonte (web development manager) has been invaluable in helping us bring our ideas to fruition." Plans are to post online information about such items as internships, community-based research projects, graduate school programs and entry-test preparation, available funding opportunities for research and continued schooling, Zotero, editing specialists, statisticians, institutional review board (IRB), auxiliary resources on campus and a calendar of upcoming workshops/seminars/events. "We know how important it is to have these resources centralized and in one easily accessible location," states Beer. "Students will be able to visit our website, contact us through email, or visit our office for information and assistance."

You may view the OSR website at <http://osr.csusb.edu/>.

Students should feel comfortable contacting Dr. Beer, her staff, or any one of the college representative advisory board members should they have research related questions or concerns. "Although we do not have an office yet, students are welcome to come see me in my faculty office during my office hours (JB 439)," or make arrangements to meet one of the OSR staff or faculty Advisory Board Members.

Advisory Board Members are: Marita Mahoney, College of Education (mmahoney@csusb.edu); Kelly Campbell, College of Social and Behavioral Sciences (kelly@csusb.edu); Kimberly Cousins, College of Natural Sciences (kcousins@csusb.edu); Jennifer Andersen, College of Arts and Letters (janderse@csusb.edu); Kristie Ogilvie, College of Business and Public Administration (kogilvie@csusb.edu); Dr. Francisca Beer – Director, Professor of Finance (fbeer@csusb.edu) (JB 439); Jessica Lee – Part-time assistant (Leej364@coyote.csusb.edu); Shan-Ju "Sarah" Ho – Intern (Hos301@coyote.csusb.edu)

Support for the OSR comes from the Provost and Associate Provost for Research. In addition, the new student success fee provides support for OSR activities. Information about the center's official opening will be posted on the ORSP website and announced to campus list-serve this Spring.

Awards: July 2011 - June 2012

SPOTLIGHT: AWARDS

Detailed award information is available to view or print on the Office of Research & Sponsored Programs website at <http://research.csusb.edu>

SPOTLIGHT: Terri Nelson's "Project GO: CSUSB ROTC Language & Culture Grant" works with the Hub program at San Diego State University (SDSU) to extend ROTC cadets' study of and enhance cadets' proficiency in critical languages. Funding will allow students from any branch to participate in intensive summer language programs at CSUSB (Arabic and Persian), including Study Abroad program(s). Also, academic year support for study of any critical language will be available for cadets from the Army ROTC Golden Lions Battalion

(headquartered jointly at CSUSB and Claremont-McKenna College) and cadets from the Air Force ROTC Detachment 002 (headquartered at CSUSB). Cadets from these two programs can pursue critical language instruction during the academic year either through registration in traditional language classes offered on their home campus (each ROTC branch covers cadets from multiple universities and colleges in three counties) or through enrollment in a class offered through CSUSB.

SPOTLIGHT: Young Suk Hwang, "Quality Teacher for Quality Students (QTQS)" project is in its fifth successful year of funding from the U.S. Department of Education. The QTQS project has developed partnerships with CSUSB, San Bernardino County Superintendent of Schools, and local school districts in San Bernardino. The primary goal of the QTQS project is to provide research-based professional development and a mentoring system for non-certified secondary content teachers to obtain fully accredited State certification and

ultimately improve academic achievement of LEP's in the targeted area. Throughout the course of five-years, the project will train 100 non-certified secondary content teachers and help them gain certification through training and mentoring, as well as provide professional development for the project mentor teachers to enhance their leadership and knowledge of collaborative teaching practices. The overall expectation is to significantly improve the literacy and language development of LEP middle and high school students.

SPOTLIGHT: Timothy Usher, "CIPAIR - Quality STEM Curriculum with Quantum Nanomaterials" project was awarded three-years of funding from NASA. This is a curriculum and research training project in collaboration with Dr. Alec Sim at College of the Desert and Mr. Kurt Kloesel at NASA Dryden. The project will develop and revise Physics curriculum at both institutions to incorporate materials science

and "nanotechnology" content by augmentation of current curricula and development of completely new curricula that reflects new ideas in scientific thought, cutting edge research, and modern educational methods. Additionally, a more seamless transition from College of the Desert and CSUSB for STEM students will be established.

"All About Grants" Podcast

The Office of Extramural Research presents conversations with NIH staff members to provide insights on grant topics, such as "How to Prepare a Grant", "Suggest a Topic", "Understand How Your Grant is Reviewed" and "Keeping up with What's Hot".

You can find past "All About Grants" podcasts and transcripts on the OER website and you may also sign up to receive new podcasts through their RSS newsfeed and/or iTunes.

New topics of interest include a podcast from Dr. Erica Brown, director of the NIH AREA program; she explains who can apply to the AREA program and what you can do to prepare the most competitive AREA application. For more information about NIH Podcasts visit:

http://grants.nih.gov/podcasts/All_About_Grants/

Performance

2011

Public Performance of original musical composition (premiere)

Title: New Year's Day (for mixed chorus, a capella)

Performance: C4 Ensemble, March 3 & 5, 2011, New York City

NEW Institutional Designation

Did you know...?

In addition to being recognized as an Hispanic-Serving Institution (HSI), CSUSB has been newly designated an HSACU (Hispanic-Serving Agricultural College and University). In general, the term "Hispanic-serving agricultural colleges and universities" means colleges or universities that - (i) qualify as Hispanic-serving institutions; and (ii) offer associate, bachelors, or other accredited degree programs in agriculture-related fields.

This is a new group of educational institutions established in the Farm Bill reauthorization that are now eligible to apply for competitive grants specific to only those of us designated as an HSACU. The Farm Bill identifies the following academic fields as critical to the USDA: agriculture, human nutrition, food science, bio-energy, and environmental science.

Congress has created five different funding programs for HSACUs: the HSACU Endowment Fund, the HSACU Equity Grants Program, the HSACU Institutional Capacity-Building Grants Program, the HSACU Extension Grants Program, and the HSACU Fundamental and Applied Research Grants Program. As with any other new federal programs, the funding for the HSACU programs is subject to budget appropriations by Congress. However, HSACUs are now eligible to apply for competitive USDA funding programs, which previously were only open to land-grant universities.

A total of 71 HSIs will be designated as HSACUs. Of those institutions, 32 are two-year institutions and 39 are four-year institutions – located in the North Central, Northeastern, Southern, and Western regions of the United States.

Presentation

2012

Research seminar on family caregiving and use of social and medical services to graduate students attending the Master in Health and Social Care, offered at the University of Valencia (Spain).

Start with a Mini-Grant!

Return
on
Investment

Some of the University's Indirect Costs are re-invested in faculty as Academic Research Mini-grants. These have proven to be a wise investment!

A study of min-grant recipients over a recent 3 year period (AY 2005/5 to AY 2007/8) found that within 3 years of receiving their mini-grant, recipients then went on to successfully gain external funding – bringing in extramural funding for every mini-grant dollar awarded!

There are several grants designed to support faculty professional development. These include mini-grants, Summer Research Fellowships, Faculty Research Leave, and the Research Study Program.

Check the Office of Academic Research website for more details and how to apply. It's been shown internal grants are a great place to start!

In addition to the OSR -- STEM Programs at CSUSB for Student Success

Bridges to Stem Research Stem Cell Scholars Internship; this program places ten undergraduate students and two graduate students per year in six-and twelve-month internships with three host laboratories: City of Hope Medical Center, UCR, and Millipore Corporation. (<http://biology.csusb.edu/stemcell/>)

Curriculum Improvement Partnership Award for the Integration of Research (CIPAIR); will develop and revise Physics curriculum at both CSUSB and COD to incorporate materials science and “nanotechnology” content

and to improve transfer articulation between these two departments. The project will also support faculty-student research activities at both campuses and at NASA Dryden in the summers. (Dr. Tim Usher; tusher@csusb.edu)

CoyoteCareers; is designed to give STEM and select foreign language students the tools they need to be competitive in today’s job market: tutoring, career workshops, internships, and networking. (<http://coyotecareers.csusb.edu>)

Cybercorps, Scholarship for Service; is a program that provides support for students to study in the field of Information Assurance and Security Management. (<http://iasm/resources/SFS.html>)

Louis Stokes Alliance for Minority Participation Program (LSAMP); increases the number of underrepresented students graduating from college with degrees in STEM. (Dr. Bellisario Ventura; bventura@csusb.edu)

Mathematics and Science Scholars Program (MASS); provides need-based scholarships for academically talented students in specific math and science disciplines. Students are paired with a mentor and receive priority registration. (<http://cse.csusb.edu/mass>)

McNair Scholars Program; encourages talented juniors and seniors who are first-generation, low-income and students from underrepresented groups to pursue a doctoral degree. (<http://mcnair.csusb.edu/>)

Minority Access to Research Careers (MARC); is for high achieving undergraduate students interested in earning a Ph.D. in research-based disciplines that relate to health (biology, chemistry, psychology). (<http://marc.csusb.edu/>)

Minority Science and Engineering Improvement Program (MSEIP) works to increase the flow of underrepresented ethnic minorities, particularly minority women, into scientific and technological careers with mentoring, workshops and paid internships. (Dr. Jeffrey Thompson; jthompso@csusb.edu)

Noyce Math and Science Scholars for Inland Empire; enhances secondary mathematics and science teaching in the SB Unified School District, for an average of 10 scholarships per year. (<http://noyce.math.csusb.edu/media/NoyceFlyerGlance.pdf>)

Watershed Management Internship Program; prepares outstanding undergraduate and graduate students from underrepresented groups for careers in the USDA’s scientific and professional workforce. (http://wri/documents/Internship_ApplicationPacket_2009.pdf)

Proactive Recruitment in Introductory Science and Mathematics (PRISM); strengthens the scientific workforce by recruiting, retaining, training, and mentoring students with strong scientific aptitude. (Dr. Rollie Trapp; rtrapp@csusb.edu)

Mark Your Calendars!

Upcoming Opportunities to Consider

See brief descriptions below – some proposals only require a 6-12 page research plan! ORSP is ready to help – contact us for more details. We can provide you a step-by-step check-list and assistance with budgeting, form completion, BIO formatting, letters of support, and electronic submission.

September 25

SC1 - Research Advancement Award (SC1) for those investigators who seek to enhance their research productivity to be able to compete for non-SCORE support - \$250,000 maximum direct costs per year, new 5 years max, renewals 4 yr max – Research Plan = 12-page limit

SC2 - At the beginning stages of a research career and who are interested in testing a new idea, generating preliminary data or for more experienced investigators interested in switching to a different field of research - \$100,000 maximum direct costs per year, 3 years max - Research Plan = 6-page limit

SC3 - Investigators who have been engaged in scholarly research and published and who seek to continue to conduct competitive research of limited scope and publish - Direct costs must not exceed \$75,000 per year, 4 years max - Research Plan = 6-page limit

October 16

R03 - small research projects that can be carried out in a short period of time with limited resources - \$50K/year, up to two years - Research Plan = 6-page limit

R21 - exploratory/developmental research projects ... [in]..early and conceptual stages of development - Direct costs are limited to \$275,000 over an R21 two-year period - Research Plan = 6-page limit

October 25

AREA R15 - stimulate research in educational institutions that have not been major recipients of NIH support - \$300K for entire period, 3 yrs max period - Research Plan = 12-page limit
