This statistical factbook is a continuation of the Term Statistics reports which had been generated by Dean Prouty since the founding of the institution. In recent years it had been maintained as a series of Excel spreadsheets. The advent of Version 5 of Microsoft Excel spreadsheet software together with the campus' switch from the SIMS to SIS+ student management information systems has lead to a significant redesign of the factbook.

The entire Statistical Factbook is now maintained as a series of seven linked Excel5 workbooks. The topics covered in each of these sections and workbooks have been listed in the preceding Contents page.

The worksheets/sections have been reorganized and expanded from earlier versions in an effort to make the data easier to find. The sample page, below, shows how to read the header and footer information on each page.

Page Labeling Sample

Versions of Excel run under several computer operating systems: Macintosh, Windows and OS/2. Contact Ross Moran, Assistant Director of Institutional Research (Ext. 5052) if you would like to arrange to receive a copy of these Excel5 workbooks on a high density 3.5 inch floppy disk (Mac or DOS format).

Better yet, Institutional Research will e-mail you copies of the Workbooks as they are updated for each term. If you are interested in receiving this Factbook via campus e-mail as it is updated and in advance of the printed version, e-mail your request to the Assistant Director at the address "rmoran@wiley.csusb.edu".

- Technical Notes**
1. The typefaces used for these tables and graphs are Arial and Arial Narrow. They are standard for the Windows operating system and correspond to Helvetica on both the Macintosh and laser printers.
 2. "Page Index" is used together with the term code for numbering the printed versions of worksheets. E.g., "B1.951" would be the Summary for Winter, 1995.
 3. All of the tabular data from the earlier printed version of the Statistical Factbook has been included in these worksheets. Fewer graphs have been routinely included. However, Excel users have many options for creating custom graphs from these tables.
 4. Some cells in this workbook contain array formulas. Calculations for cells reflecting future terms may return spurious errors. The text in those cells has been colored white to suppress the display of contents.

Technical Notes

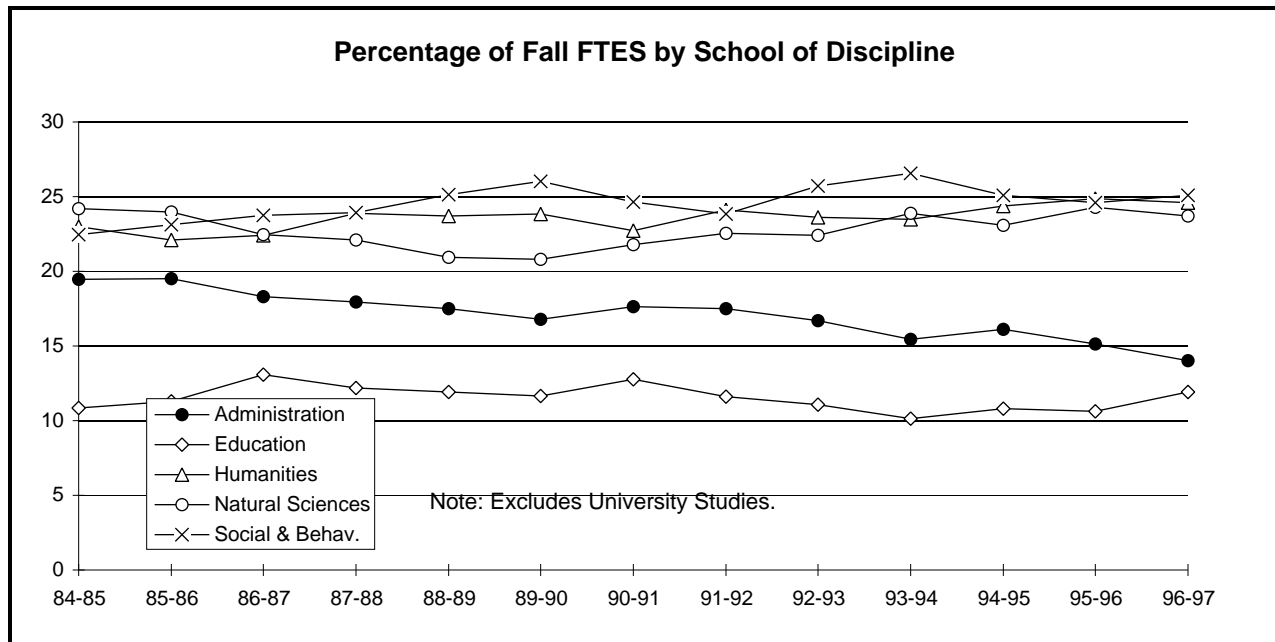

1. The typefaces used for these tables and graphs are Arial and Arial Narrow. They are standard for the Windows operating system and correspond to Helvetica on both the Macintosh and laser printers.
2. "Page Index" is used together with the term code for numbering the printed versions of worksheets. E.g., "C3.951" would list Winter FTES as of 951.
3. All of the tabular data from the earlier printed version of the Statistical Factbook has been included in these worksheets. Fewer graphs have been routinely included. However, Excel offers many options for generating custom graphs from these tables.
4. Some cells in this workbook contain array formulas. Calculations for cells reflecting future terms may return spurious errors. The text in those cells has been colored white to suppress the display of contents.

Technical Notes

1. Major counts are based solely upon students enrolled as of census for greater than zero units. These tallies do not account for students who may be active on campus but not enrolled in courses or for students who may have "stopped out" for the term.
2. The typefaces used for these tables and graphs are Arial and Arial Narrow. They are standard for the Windows operating system and correspond to Helvetica on both the Macintosh and laser printers.
3. "Page Index" is used together with the term code for numbering the printed versions of worksheets. E.g., "D3.954" would list Fall enrollment trends by major through 1995.
4. All of the tabular data from the earlier printed version of the Statistical Factbook has been included in these worksheets. Fewer graphs have been routinely included. However, Excel offers many options for generating custom graphs from these tables.
5. Some cells in this workbook contain array formulas. Calculations for cells reflecting future terms may return spurious errors. The text in those cells has been colored white to suppress the display of contents.

Technical Notes

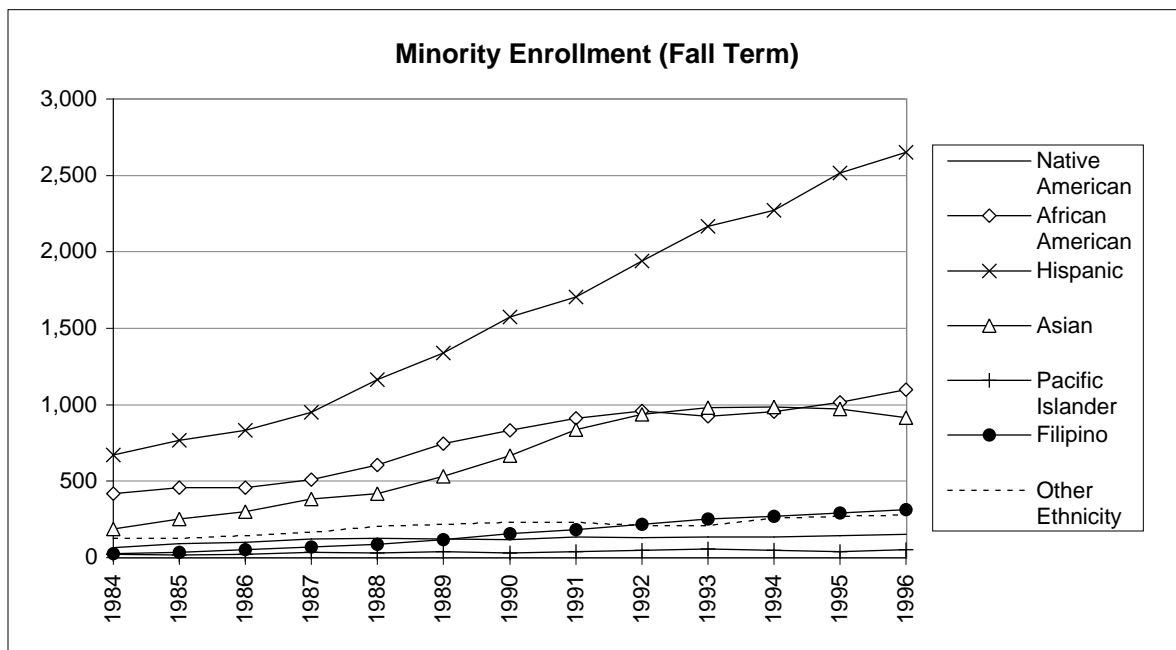

1. The typefaces used for these tables and graphs are Arial and Arial Narrow. They are standard for the Windows operating system and correspond to Helvetica on both the Macintosh and laser printers.
2. "Page Index" is used together with the term code for numbering the printed versions of worksheets. Eg. "E1.944" would be the Summary as of Fall, 1994.
3. All of the tabular data from the earlier printed version of the Statistical Factbook has been included in these worksheets. Fewer graphs have been routinely included. However, Excel offers many options for generating custom graphs from these tables.
4. Some cells in this workbook contain array formulas. Calculations for cells reflecting future terms may return spurious errors. The text in those cells has been colored white to suppress the display of contents.

Percentage of Fall Enrollment by Ethnicity within Class Level

The following series of tables show the trends in the ethnic composition of the CSUSB student body over the last eight years. The first two pages give the percentage of students within a class level and fall term who were identified as belonging to a specific ethnic group (as defined for the most recent equity reporting). Foreign students and those with unknown ethnicity are included with the "other" group. The last two pages give the actual enrollment.

The strongest trend, evident at all class levels, is the increase in the percentage of minority students. These tables may also provide a crude estimate of retention. While not based on cohorts, it is still interesting to compare the relative percentages of FTF and Juniors with the next years' percentages of Sophomores and Seniors.

Technical Notes

1. The typefaces used for these tables and graphs are Arial and Arial Narrow. They are standard for the Windows operating system and correspond to Helvetica on both the Macintosh and laser printers.
2. "Page Index" is used together with the term code for numbering the printed versions of worksheets. E.g., "F1.93/94" would give the average years required to earn a degree through academic year 93/94.
3. All of the tabular data from the earlier printed version of the Statistical Factbook has been included in these worksheets. Fewer graphs have been routinely included. However, Excel offers many options for generating custom graphs from these tables.
4. Some cells in this workbook contain array formulas. Calculations for cells reflecting future terms may return spurious errors. The text in those cells has been colored white to suppress the display of contents.

Technical Notes

1. The typefaces used for these tables and graphs are Arial and Arial Narrow. They are standard for the Windows operating system and correspond to Helvetica on both the Macintosh and laser printers.
2. "Page Index" is used together with the term code for numbering the printed versions of worksheets. E.g.. "C3.951" would list Winter FTES as of 951.
3. All of the tabular data from the earlier printed version of the Statistical Factbook has been included in these worksheets. Fewer graphs have been routinely included. However, Excel offers many options for generating custom graphs from these tables.
4. Some cells in this workbook contain array formulas. Calculations for cells reflecting future terms may return spurious errors. The text in those cells has been colored white to suppress the display of contents.
